INTRODUCTION

Approval Manager app is designed to collect all approvals records (whether it is pending, approved or rejected) at one place. We can approve or reject the pending approvals records from here. This User Guide demonstrates 3 Environments in salesforce: Classic Mode, Lightning Mode & Mobile App.

-  Easily manageable custom selection
-  Simplistic implementation to save your time
-  Easy to Filter & Access records that needs “Approval” or “Rejection”

LOGIN INTO THE ENVIRONMENT - FRONT END

To begin, the user must login to their salesforce org.
Once the user is logged in the following dashboard appears.

Fill in the user credentials.

User name
(Case sensitive)

Password
(Case sensitive)

Click on login.

The login form features the Salesforce logo at the top. Below it are two input fields: 'Username' with a '1 Saved Username' link and 'Password'. A blue 'Log In' button is positioned below the password field. A 'Remember me' checkbox is checked. A 'Forgot Your Password?' link is at the bottom left. The footer contains the copyright notice: '© 2020 salesforce.com, inc. All rights reserved.'

The screenshot shows the Salesforce dashboard. At the top, there's a search bar and navigation tabs for 'Setup', 'Home', and 'Object Manager'. A 'Quick Find' search bar is on the left. The main content area is titled 'SETUP Home' and includes a 'Create' dropdown. Three featured cards are visible: 'Mobile Publisher' (with a 'Learn More' button), 'Real-time Collaborative Docs' (with a 'Get Started' button), and 'Join the Trailblazer Community' (with a 'Join Now' button). Below these is a 'Most Recently Used' section showing '10 Items'. A left-hand navigation menu lists various setup options like 'Multi-Factor Authentication Assistant', 'Release Updates', and 'Administration'.

performed automatically. You can allow users to access your site through your unique Salesforce domain and URL, or you can register your own branded domain or subdomain to redirect to your site.

Create multiple sites that appeal to different audiences and satisfy your company's various business needs. For example, a software company could create one site for new developers, another for customers, and a third for marketing.

Sample sites URLs

- Company.force.com/customers
- Company.force.com/developers
- Company.force.com/partners

To get started, first register your company's domain name and must consist of only alphanumeric characters. Salesforce.com recommends using your company's domain name.

You cannot modify your Salesforce site domain name after the registration process is complete.

http://approvalPB01-developer-edition.ap24.force.com **Check Availability**

Success: The Salesforce site domain name "approvalpb01-developer-edition" is available.

I have read and accepted the Salesforce Sites Terms of Use. **Register My Salesforce Site Domain**

PART 1
Install & Configure
Sites Configuration & Custom Settings

Once the Domain name is available, Check the box and Click on Register my Salesforce site domain

Enter the Domain name and Check for the Availability.

POST - SITE CONFIGURATION

The screenshot shows the Salesforce Setup page for Site Configuration. The left sidebar contains navigation options such as Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Release Updates, Lightning Experience Transition Assistant, New Salesforce Mobile App QuickStart, Lightning Usage, Optimizer, and ADMINISTRATION (Users, Data, Email). The main content area is titled 'Sites' and displays the following information:

- Your Salesforce site domain name is **testpbv-developer-edition.ap18.force.com**
- Link to [Salesforce Sites Terms and Conditions](#)
- Settings** section with a yellow information banner: "These settings affect all Salesforce sites."
- Checkboxes for:
 - Assign new records created by Salesforce Sites guest users to a default owner in the org [i](#)
 - Allow using standard external profiles for self-registration and user creation [i](#)
- Buttons for **Save** and **Cancel**
- A table header for **Sites (testpbv-developer-edition.ap18.force.com)** with a **New** button highlighted by a red box.
- Table columns: Site Label ↑, Site URL, Site Description, Active, Site Type, Last Modified By
- Text below the table: "No records to display."

Post Registration
Click on "New" on
the redirected page

POST - SITE CONFIGURATION

Fill in the Following Mandatory Fields:

- Site label
- Site Name
- Site Contact
- Default Record Owner
- Active Site Homepage
- Clickjack Protection Level

Click on Save.

The screenshot shows the Salesforce Setup interface for configuring a site. The left sidebar contains navigation options: Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Release Updates, Lightning Experience Transition Assistant, Lightning Usage, Optimizer, and ADMINISTRATION (Users, Data, Email). The main content area is titled 'Sites' and contains the following fields:

- Site Label:
- Site Name:
- Site Description:
- Site Contact:
- Default Record Owner:
- Default Web Address:
- Active:
- Active Site Home Page:
- Inactive Site Home Page:
- Site Template:
- Site Robots.txt:

POST - SITE CONFIGURATION

Now the Site has been Configured

The screenshot shows the Salesforce Setup interface for a site configuration. The left sidebar contains navigation options such as 'Setup Home', 'Service Setup Assistant', 'Multi-Factor Authentication Assistant', 'Release Updates', 'Lightning Experience Transition Assistant', 'Lightning Usage', 'Optimizer', 'ADMINISTRATION' (with sub-items 'Users', 'Data', 'Email'), and 'PLATFORM TOOLS'. The main content area is titled 'Sites' and shows the configuration for a site labeled 'Approval App'. The 'Approval App' label is highlighted with a red box. Below the site name, there are buttons for 'Edit', 'Public Access Settings', 'Login Settings', 'URL Redirects', and 'Deactivate'. The configuration table includes fields for Site Label, Site Description, Active status, Site Name, Site Contact, Site Favorite Icon, Site Robots.txt, Site Template, Analytics Tracking Code, Clickjack Protection Level, Lightning Features for Guest Users, Enable Content Sniffing Protection, Referrer URL Protection, Site Name, Site Contact, Login, Site Favorite Icon, Site Robots.txt, Enable Feeds, URL Rewriter Class, Require Secure Connections (HTTPS), Upgrade all requests to HTTPS, Enable Browser Cross Site Scripting Protection, Guest Access to the Payments API, and Default Record Owner.

Custom Settings

Use custom settings to create and manage custom data at the organization, profile, and user levels. Custom settings data is stored in the application cache. This means you can access it efficiently, without the cost of repeated queries. Custom settings data can be used by formula fields, Visualforce, Apex, and the Web Services API.

Approval App Configuration

Custom Setting

If the custom setting is a list, click **New** to add a new set of data. For example, if your application had a setting for country codes, each set might include the country's name and dialing code.

If the custom setting is a hierarchy, you can add data for the user, profile, or organization level. For example, you may want different values to display depending on what specific user is running the app, a specific profile, or just a general user.

PART 4
How To Recall Records

Enter the *details* of the new record.

RECALL RECORDS - SUBMIT FOR APPROVAL

The screenshot shows a Salesforce lead record for 'Lead Jacob' at 'Real Tech Ltd.'. The page includes a navigation bar with 'Sales', 'Home', 'Opportunities', 'Leads', 'Tasks', 'Filters', 'Dashboards', 'Reports', and 'More'. A search bar is present at the top. The lead details section shows fields for Title, Company, Phone (2), and Email. A blue callout box with the text 'Click on Submit for Approval.' points to the 'Submit for Approval' button in the top right of the lead details section. Below the lead details is a progress bar with stages: 'Open - Not Contacted' (selected), 'Working - Contacted', 'Closed - Not Converted', and 'Converted'. A 'Mark Status as Complete' button is also visible. The main content area is divided into 'Activity' and 'Related' sections. The 'Activity' section has tabs for 'Details', 'Chatter', and 'News', and a 'New Task' button. The 'Related' section shows 'We found no potential duplicates of this Lead.', 'Campaign History (0)', and 'Approval History (0)'. At the bottom left, there is a logo for 'Approval Manager' powered by 'Algoworks'. At the bottom right, a red banner reads 'PART 4 How To Recall Records'.

RECALL RECORDS - RECALLED

The screenshot shows a Salesforce lead record for 'Lead Jacob'. The navigation bar includes 'Sales', 'Home', 'Opportunities', 'Leads', 'Tasks', 'Files', 'Accounts', 'Contacts', 'Campaigns', 'Dashboards', 'Reports', and 'More'. The lead record page has a '+ Follow' button and buttons for 'New Case', 'New Note', and 'Submit for Approval'. A blue speech bubble is overlaid on the page with the text: "Hurray! The approval request has been *recalled*." The right sidebar shows 'Campaign History (0)' and 'Approval History (2)'. The 'Approval History' section contains two entries:

- Step 1**

Daily Reminder Settings

APPROVAL REMINDER

Select the *Default Time Zone* from the drop-down.

The screenshot shows the Salesforce 'Approval Manager' settings page. The 'Default Time Zone' dropdown menu is open, displaying a list of time zones. The 'GMT-08:00 Pacific Standard Time (America/Los_Angeles)' option is selected and highlighted in blue. Below the dropdown, there are two warning messages in yellow boxes:

- Warning 1:** Enabling this preference can increase the compiled size of existing formulas that contain the DATEVALUE() function. Before enabling this preference in production, use the formula editor in a sandbox to make sure that formulas that contain the DATEVALUE() function still compile to fewer than 5,000 characters. There is an unchecked checkbox for 'Improve DATEVALUE() accuracy for DST'.
- Warning 2:** Turning on multiple currencies introduces permanent changes in your org. This feature can't be turned off. Review the [Implications of Enabling Multiple Currencies](#) before enabling. There is an unchecked checkbox for 'Activate Multiple Currencies'.

The 'Currency Settings' section shows 'Currency Locale' set to 'English (United States) - USD'.

PART 6 Filters Flow & Refresh Button

You can view all the *approved & pending* records for the object.

FILTERS FLOW

Use the **Approval Type** filter to view the records according to their approval status.

The screenshot shows the Salesforce Approval Manager interface. On the left, there is a sidebar with filters: Object (Lead), Approval Type (Pending), Submitted By (Select), From: (From date), and To: (To date). Below the filters are 'Reset' and 'Filter' buttons. The main area displays a table of records with columns: Request Name, Object Type, Status, Submit Date, Submitted By, Comment, and Action. The table contains 9 records, all with a status of 'Pending' and a submit date of 'Dec 23, 2020'. The 'Action' column for each record contains icons for a person, a checkmark, and an 'X'. At the bottom of the table, it says 'Page 1 of 1 Pages | Displaying 9 to 10 out of 9 records'. The footer of the interface includes the 'Approval Manager' logo and 'POWERED BY Algoworks'.

Request Name	Object Type	Status	Submit Date	Submitted By	Comment	Action
Henry	Lead	Pending	Dec 23, 2020	Liam Williams		Person, Checkmark, X
Alexander	Lead	Pending	Dec 23, 2020	Liam Williams		Person, Checkmark, X
