

AIR Engage for Healthcare

A Cost-Effective Telehealth Solution

CopperHill AIR Engage for Healthcare is a fully integrated telehealth application inside Salesforce. AIR Engage helps you simplify virtual meetings, enhance productivity, and increase security. It is powered by the #1 cloud computing platform to be used within the #1 CRM to add value without adding complexity.

CopperHill is a partner of both Amazon Web Services (AWS) and Salesforce. We built AIR Engage as a bridge that connects the two complimentary platforms, specifically to meet the need for Telehealth solutions and to help you deliver cost-effective patient care.

For more information contact Tyler Wax at tyler.wax@consultCH.com or 267-664-5125.
