

Installation of Smart vCard In Lightning

Installing Smart vCard is simple and works like any other component you've installed from AppExchange.

Installing the component

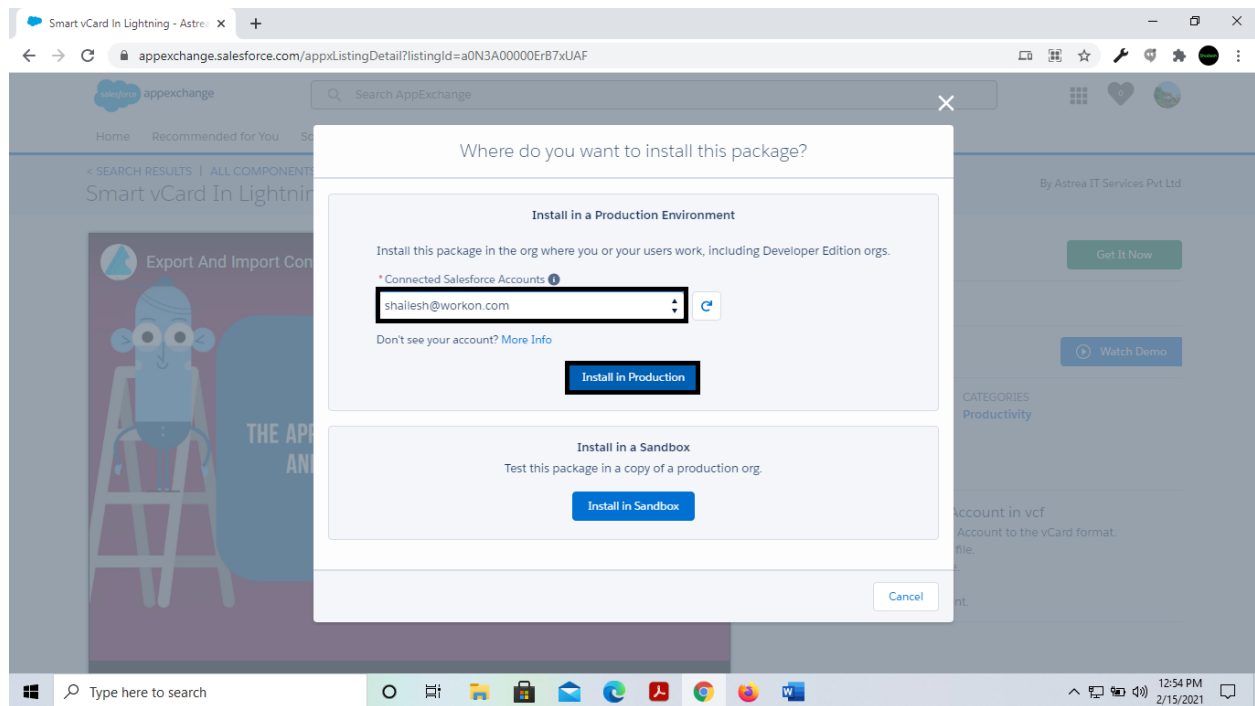

The installation will be starting via redirecting to the link below :

<https://appexchange.salesforce.com/appxListingDetail?listingId=a0N3A00000ErB7xUAF>

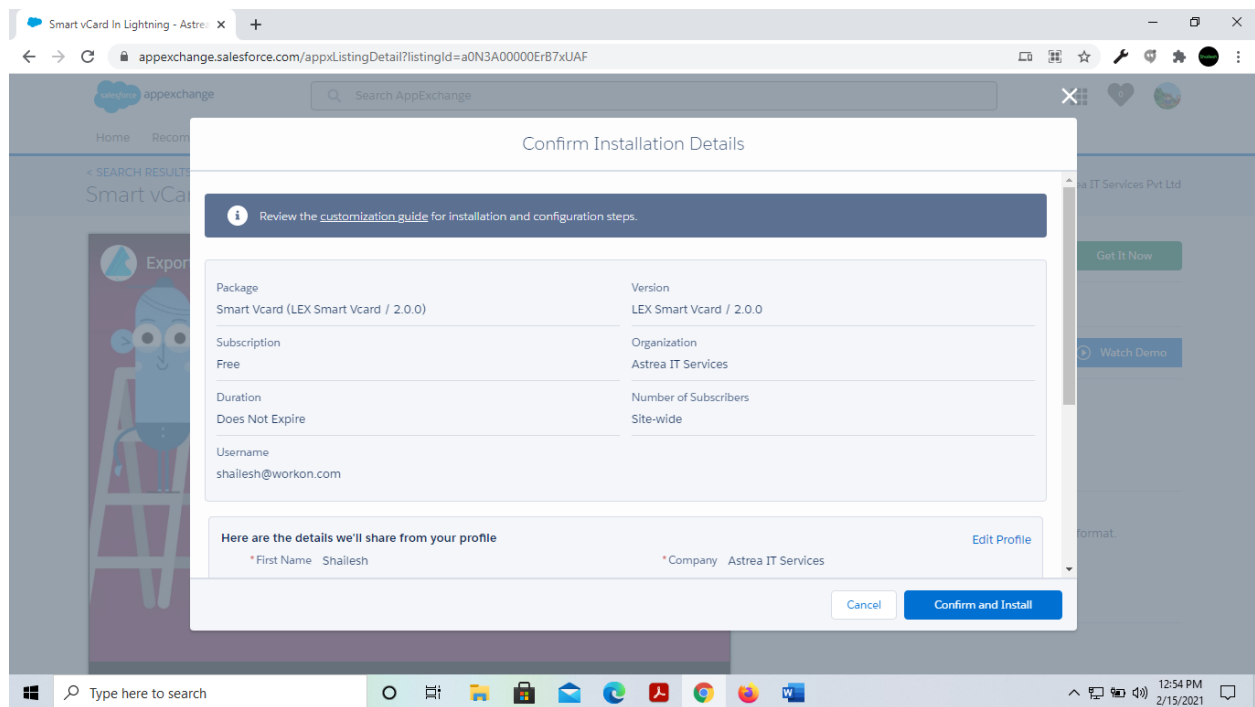

At the listing, click the “Get It Now” button to get the process started.

The screenshot shows the Salesforce AppExchange interface for the 'Smart vCard In Lightning' app. The browser address bar shows the URL: appexchange.salesforce.com/appxListingDetail?listingId=a0N3A00000ErB7xUAF. The app listing features a video player with a play button and a 'Copy link' icon. The video content includes the text 'Export And Import Contacts With Smart vCard Salesforce Applicati...' and 'THE APP ALSO PERFORMS BOTH IMPORT AND EXPORT ON SALESFORCE1'. To the right of the video, there is a 'Get It Now' button, a 'Free' price tag, a 'Watch Demo' button, a 5-star rating (6 reviews), and a 'LATEST RELEASE' date of 3/12/2019. The app is categorized under 'Productivity'. Below this, a list of features is provided: 'Export, Import Contact, Lead, Account in vcf', 'Export any of your Contact, Lead and Account to the vCard format.', 'Import multiple contacts from a VCF file.', 'Import multiple Leads from a VCF file.', 'Support VCF 3.0 & VCF 2.1 format.', and 'Now available as Lightning Component.' The bottom of the screenshot shows the Windows taskbar with various application icons and the system clock indicating 12:53 PM on 2/15/2021.

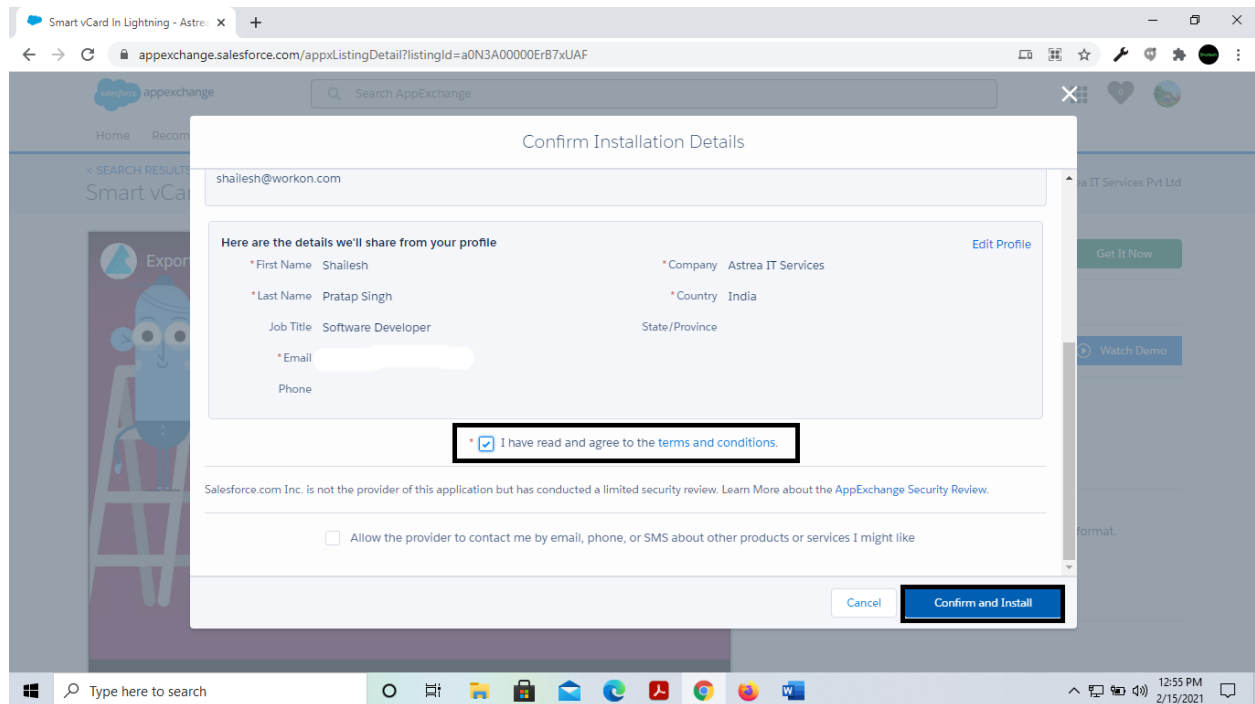

Choose the salesforce account, in which you want to install the component and click choose one of the option from picklist or login with new org.

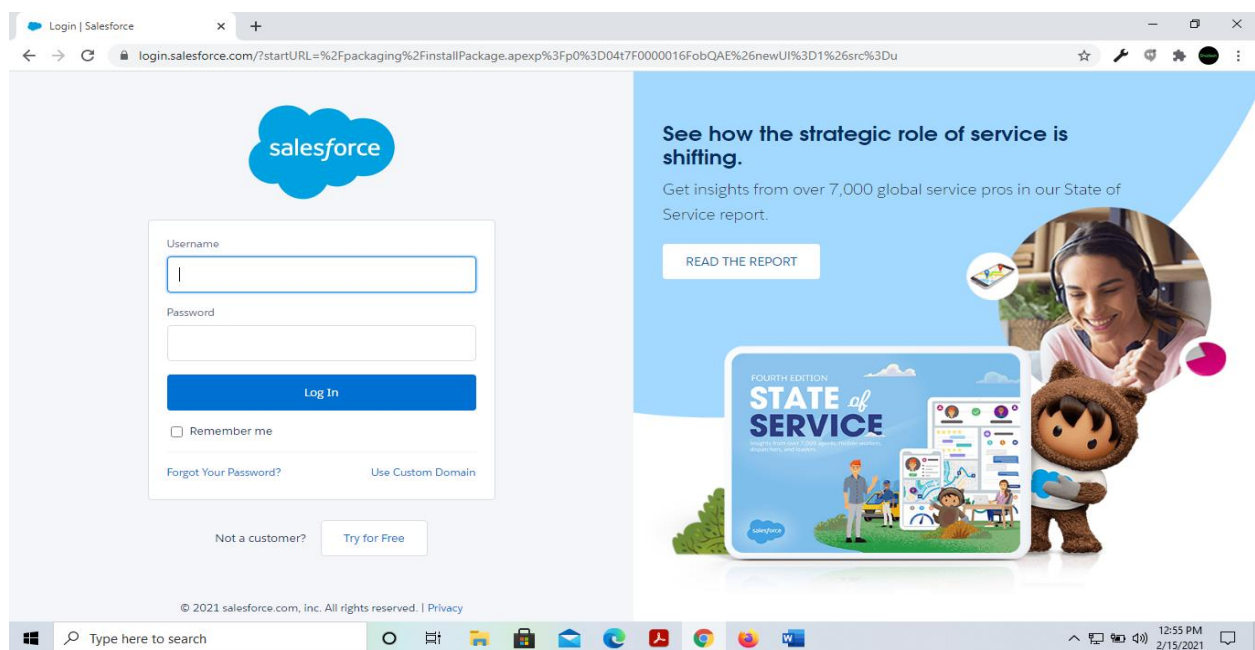

New window will open as below. Then scroll down the window to check the checkbox and fill all mandatory information.

Check the checkbox and click “Confirm and Install” button.

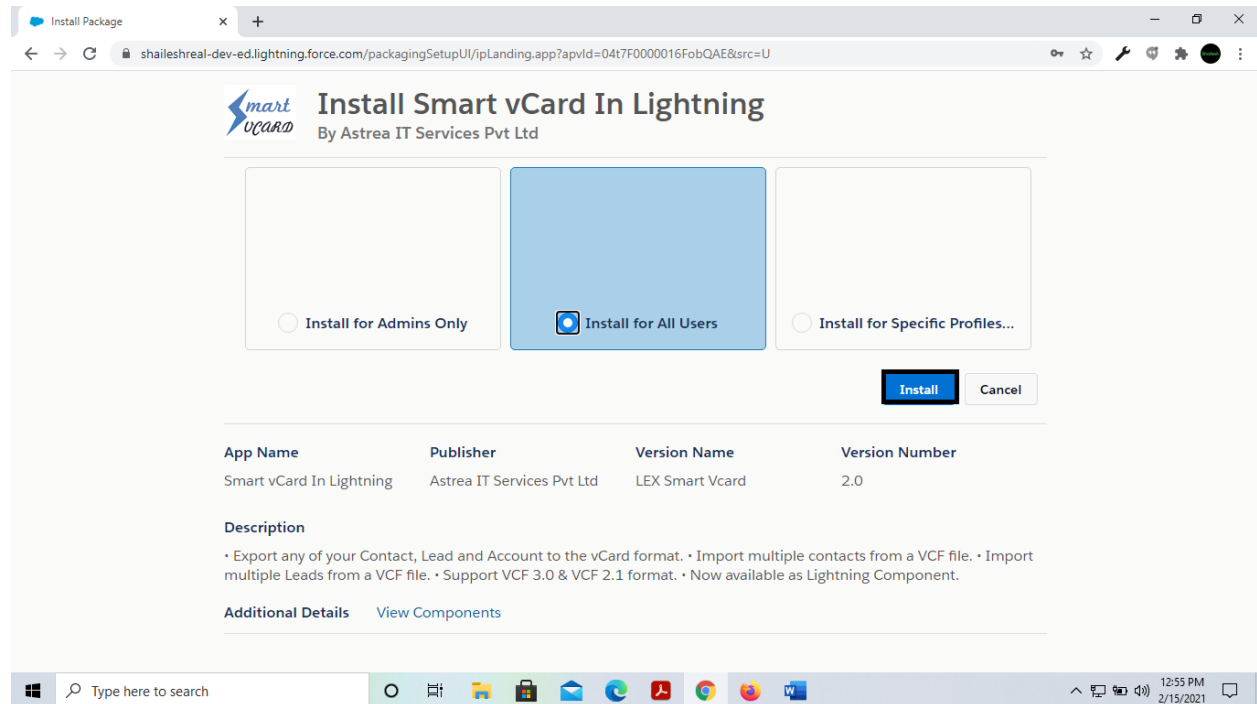

A new Login window will open. Enter credentials of org in which you want to install the component and click “Log In” button.

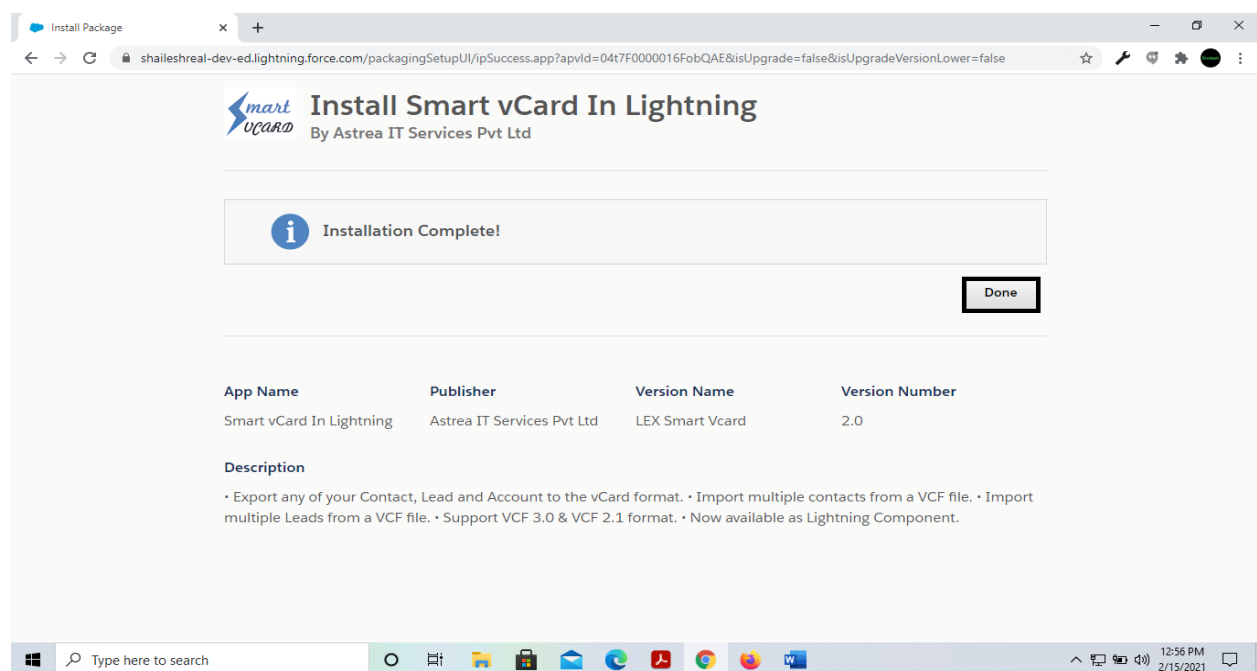

Final Step For Installation:-

After login with credential just choose one option that shows to whom you want to give access or permission to use this app then click on install and done button.

Wait untill the “Installation Complete!” message appear on the window. Then click on done button.

A new window will appear that will show the installed packages in the org.

PACKAGES

Apps and components are installed in packages. Any custom apps, tabs, and custom objects are initially marked as "In Development" and are not deployed to your users. This allows you to test and customize before deploying. You can deploy the components individually using the other features in setup or as a group by clicking Deploy.

Depending on the links next to an installed package, you can take different actions from this page.

To remove a package, click Uninstall. To manage your package licenses, click Manage Licenses.
