

CRM App for Atlassian Jira

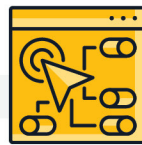

- Connect your tools.
- Integrate your sales, support and dev teams.
- Deliver amazing results.

Goldfinger's CRM app lets you integrate top CRMs, including Salesforce, SugarCRM, and Microsoft Dynamics 365 with Atlassian Jira. It enables automatic, real-time synchronization between different systems, so you can reduce manual updates and focus on your most important work.

Bi-directional flow of information

Supports many-to-many mappings in both directions to integrate information between Jira and CRM and reduce manual processes.

Highly Configurable

Users can specify which fields are copied between systems and under which conditions.

Extensive control over comments and attachments

Copy comments and attachments between Jira and any CRM record – either automatically or manually.

Control which comments are copied and the visibility of those comments in the other system.

Our CRM app supports

The plugin is also compatible with Atlassian Jira Data Center.
