

Adyen Salesforce Payments App - Order Management System (OMS)

Adyen's easy to integrate payments app for a seamless OMS journey.

Save time and grow your business with a truly unified payments platform. Adyen provides a modern end-to-end infrastructure that connects directly to Visa, MasterCard, and many other globally preferred ways to pay.

Streamline Operations

Simplify reporting with one consolidated reporting view on all your payments, which saves you time and allows you to better predict settlement dates and fully manage the reconciliation process. Compatible with Salesforce B2B and B2C Commerce Cloud.

Grow globally

Let shoppers pay the way they want, anywhere in the world, and add new payment methods to your checkout with the flip of a switch. Easily onboard new businesses and sales channels at the flick of a switch. As you grow, quickly set up new accounts for different regions, sales channels or business units. Adyen supports all popular payment methods: Diners Club, Interac, iDEAL, Apple Pay, Google Pay™, Klarna, PayPal, Affirm, and everything in between.

One integration, all of Adyen

Get our industry leading checkout, all global and preferred local payment methods, payment fraud protection, and conversion optimization out of the box. With minimal set up required when integrating into Salesforce B2B and B2C Commerce.

Robust protection

Minimize fraud and maximize conversions with industry-leading risk management tools. Offer more secure ways of processing card data, and reduce the scope of your PCI assessments, by using secured fields at your checkout.

Features
