Clint Lee, Founder/CEO

"I've worked with CRMified on a number of projects over the past several years. CRMified consistently exceed expectations in project management, communication, responsiveness, and quality of work. CRMified really cares about the outcome of their work and adds a tremendous amount of value to each project we do. They've become an invaluable extension of our team, and I highly recommend working with them."

Candy Cowan, Co-Founder

"CRMified were very quick to understand the Kowalah vision, and more importantly how the many parts of the Salesforce platform could enable them to deliver that vision. They have a strong understanding of the most recent Salesforce developments - in our case a highly customised Lightning Community supported by Mobile Publisher. Collaboration worked really well even though geographically we were very spread out. A combination of video and collaborative documents ensured we were always very clear on what had been delivered and what was next. The team were very capable in pushing back on product requests that didn't make sense, leaving us with a well designed and simple to administer solution."
