Cognizant HCP Portal

OVERVIEW

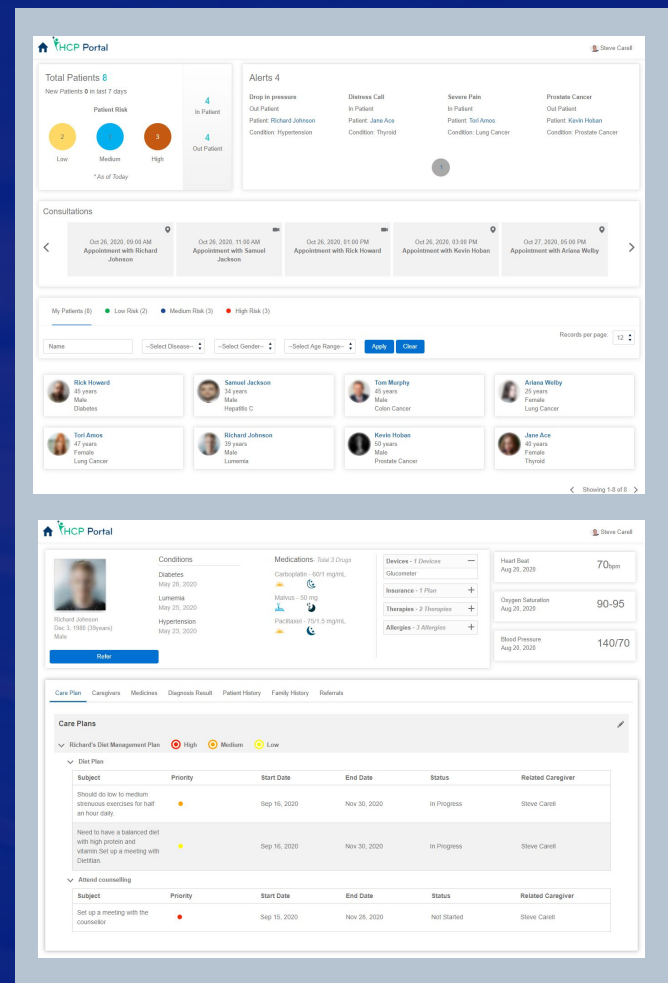

HCPs are the most critical part of all patient journeys. It is crucial to optimize their time for efficient delivery of healthcare. The HCP portal helps in digitizing Patient information and placing relevant information at HCP's fingertips.

VALUE PROPOSITION

The HCP portal is built using Salesforce Community Cloud and utilizes Health Cloud capabilities to present 360 view of patient's medical information. It help HCPs to keep track of their patients, receive alerts, update care plan and refer patients to specialists.

KEY CAPABILITIES

- Track patients and appointments
- Track patient risk and receive alerts
- View patient's medical history and get 360 view of patient's current status
- View and update patient care plan
- Track patients referrals
