Patient Portal

OVERVIEW

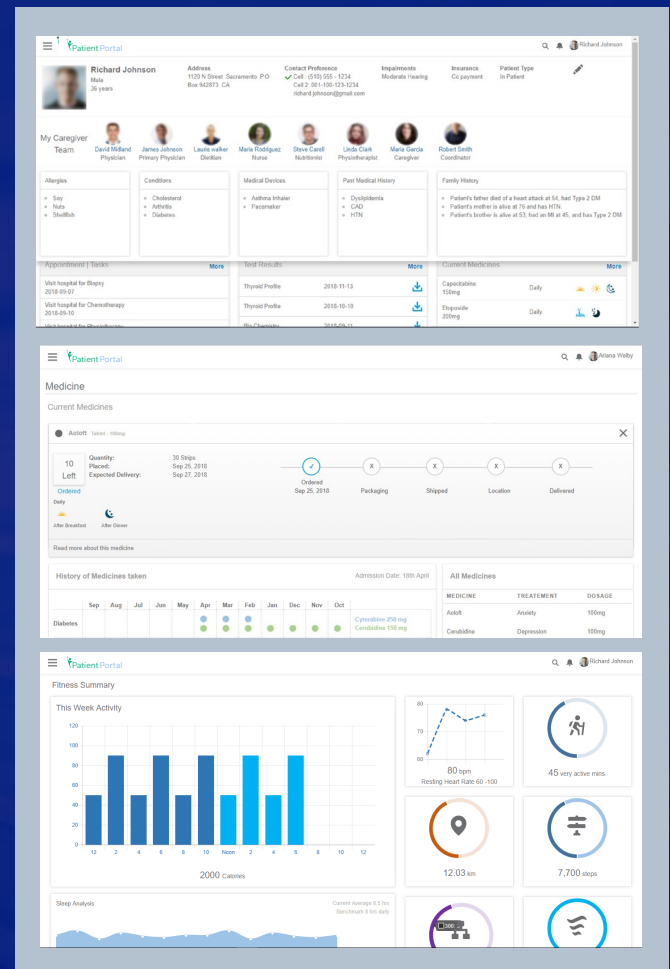

Patient Portal helps in digitizing Patient journey. It has been shown that making medical data easily accessible in a meaningful way has led to increased medical adherence.

VALUE PROPOSITION

The data available in Health Cloud is leveraged to provide a 360° view of patient's medical data like care plan and prescriptions. It also enables collaboration between patients and caregivers for better care delivery.

KEY CAPABILITIES

- Providing a 360 view of their medical data to the patient.
- Leverage EHR records along with custom capabilities like family history
- Track appointments with HCPs
- View and collaborate with care team
