

MuleSoft iPaaS and API solutions

We strive to understand a client's business drivers and strategic goals so that we can help to measure them and achieve success. MuleSoft can drive real strategic change and be a key part of any transformation initiative. An investment in MuleSoft can be a forcing function for businesses to clean up data, revisit business processes, and more importantly, rethink how they engage with their employees, customers and prospects.

We deliver end-to-end services for clients leveraging MuleSoft as a platform. We define and implement the right operating model to enable and promote self-service, reuse and discoverability. We bring an approach and accelerators to set our clients up for accelerated time to value as well as sustainable success. Our center for enablement offers:

- **Architecture and design:** Design how your ESB/API management will integrate into your IT/IS environment. We offer platform architecture and SOA/API-zation of your business process and data with innovative methodology.
- **Strategy and advisory:** We work closely with stakeholders to determine business objectives and understand the ecosystem. We offer SOA/API management strategy and roadmapping, architecture best practices, and solution assessments and recommendations.
- **API projects:** We deliver API projects, providing business support, and agile-ready delivery team, and agile and industrialized project methodology, and digital roll-out
- **API factory:** We drive value with design thinking with business/digital teams, API promotion, and an innovation lab.

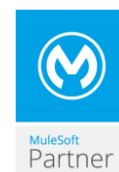

Summary

- Human-centered design approach
- 300+ certified consultants on/off shore
- 50% Salesforce practice growth
- 50+% ACV YOY Growth
- 150+ Lightning components delivered as accelerators at no added cost

Product expertise:

Platform, Sales, Service, Marketing, Manufacturing Cloud, Einstein, Commerce, Shield, Community, CPQ, Field Service, Tableau, MuleSoft and Vlocity

Engagement models

As a MuleSoft Partner, CGI offers full implementation services and scaled Managed Services with full Dev-Ops capabilities. In any type of engagement, CGI has flexibility to customize our engagement models to create a hybrid approach based upon the needs of the client.

- **MuleSoft projects:** We engage in project efforts with a full team, including Project Management with MuleSoft experienced, agile-certified PMs to oversee all phases of work from design to deployment, including training. We deliver on a T&M or Fixed Fee basis, depending upon the specificity of the requirements and deliverables, and the nature of the work.
- **Staff augmentation:** CGI sources specific skill sets to augment our client's existing team.
- **Managed services:** Many of our clients outsource Continuous Development, support, and release management / DevOps activities to CGI as part of a managed services engagement.

Why work with us?

- **Industry expertise:** Our in-depth knowledge of a client's business environment and landscape
- **Human-centered design:** Design focused on user behavior combined with proven agile and lean operations
- **Global delivery/proximity model:** Local presence combined with global delivery capability, including 12 MuleSoft Delivery Centers across the globe
- **Client relationships:** Our understanding of the client's business drivers and our commitment to meeting their objectives
- **CGI accelerators:** Pre-built Lightning components and industry solutions for faster time to value with no added cost
- **Partnership:** CGI has been a Salesforce partner since 2010 with 15+ years of MuleSoft project experience
