nagarro

A digital engineering leader with a full-service portfolio

How can you harness the power of technology to succeed in growing your business?

Our clients need to become digital-first companies that compete through superior software platforms. Nagarro helps to transform, adapt, and build new ways into the future through a forward thinking, agile and CARING mindset.

We excel at digital product engineering and deliver on our promise of thinking breakthroughs.

Today, we are 8,400+ experts across 25 countries, forming a Nation of Nagarrians, ready to help our customers succeed.

Thinking Breakthroughs

AI, data, cloud, and automation are the keys for future-ready solutions. We bring advanced expertise in these areas when engaging with clients.

Our services include:

Digital Product Engineering

Our clients need to transform themselves into digital native companies that compete through superior software platforms. We enable this.

Capabilities that Nagarro brings:

- UX Design, rapid prototyping
- Enterprise Agile engineering
- Thinking Breakthroughs innovation
- Digital Ventures consulting
- Agile and DevOps advisory

Digital Commerce and Customer Experience

Consumers today are more informed and more demanding than ever. We help businesses keep up.

Capabilities that Nagarro brings:

- Digital business consulting
- Experience-led commerce
- AI-driven CX and hyper-personalization
- Digital Marketing

Managed Services

Increasing digitalization leads to a larger need for multi-skilled services to successfuly run and manage the entire digital landscape. We excel at this.

Capabilities that Nagarro brings:

- Application management and enhancements
- Cloud hosting and management
- SecOps
- Transition management
- Helpdesk and ticketing

New-Gen ERP Consulting

As companies go digital, the ERP must not just keep pace, but should lead the innovation process. We accelerate this.

Capabilities that Nagarro brings:

- Strategy and process consulting
- SAP cloud solutions (Diamond award, 2020)
- Transformation to S/4 HANA
- Add-ons with own IP
- Custom-developed extensions

Success Stories

Flight Planning for over a hundred airlines

Nagarro builds the flight planning software for Lufthansa Systems, which is used by 110 airline customers to calculate over 30,000 flights daily. It optimizes take-off and landing performance, the flight route, and the flight level profile - considering all flight restrictions, CO2 emission targets, weather and historical aircraft data.

When your pilot says "Your estimated flight time is 4 hours and 57 minutes," they are likely relying on Nagarro-built software.

Agile Testing at the ÖBB Ticketshop

The goal? Unify all sales channels (web, mobile, customer service, vending machines, train attendants, partners, etc.) into a new service - oriented architecture with standardized APIs.

From conception to implementation of the agile process, we delivered on time, regardless of complexity and changing requirements and priorities.

One library to rule them all

The Need? Create a unified library of visual styles, UI components, and code — enabling RMS designers and developers to create consistent high-fidelity prototypeswith ease.

The Design System is a product used by the entire organization for all RMS Applications. It minimizes inconsistencies, promotes better user experience, and accelerates product releases.

Implementing the new Connected Worker

Ever imagine what smart technology could do for your business? Nokia did. We started with Fiab 2.0, an Assisted Reality solution enabling connected workers to perform the entire manufacturing and assembly processes using smart glasses. In 2020 we expanded the Fiab platform and implemented an AI video solution that improved worker safety.

The correct application of smart technology improves collaboration, brings better efficiency keeping workers safety aspects in mind.
