

Cellular Orchestration. Evolved.

Introducing

OCELLOS

by TrakCel

TrakCel

OCELLOS by TrakCel is a revolutionary out-of-the-box cellular orchestration platform.

It uses a flexible, modular framework which quickly configures to meet most autologous, allogeneic and personalized cancer vaccine business processes.

It's also the first and only cellular orchestration platform available on the Salesforce AppExchange – the world's leading enterprise cloud marketplace.

See the journey™

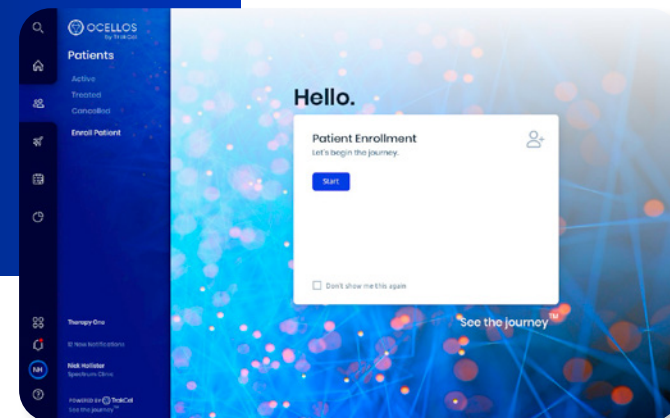

What's so special about OCELLOS by TrakCel?

OCELLOS by TrakCel's modular framework enables pharmaceutical manufacturers to **seamlessly orchestrate their advanced therapy from Clinical Trial through to Commercial settings**, delivering scalable and regulatory compliant solutions.

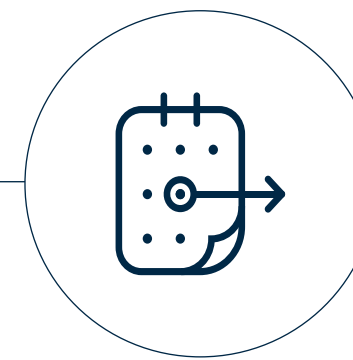

Who is it created for?

Healthcare providers, logistics managers, manufacturers, case managers, therapy champions.

The beauty of OCELLOS by TrakCel is that it's the perfect solution for managing all stages of the advanced therapy journey.

- Patient enrollment and starting a chain of identity has never been easier

- Intuitive calendars allow for fast visualization of manufacturing capacity across multiple global sites, with multiple therapy cycles supported out-of-the-box

- Real-time access to all cellular orchestration, with the option of out-of-the-box or easily generated custom reports

Who is TrakCel?

TrakCel is the first provider of integrated cellular orchestration solutions for the precise management, control and tracking of cell and gene therapy products.

With the largest number of live deployments, supporting the broadest number of therapy classes in the industry, we understand the unique challenges faced by advanced therapy developers globally.

Utilizing advanced Chain of Identity (COI) and Chain of Custody (COC) functionality, we're committed to streamlining the delivery of therapies to patients at their most vulnerable.

Want to see the transformative power of OCELLOS by TrakCel for yourself?

We believe that our innovation will transform how you do things in the future and we'd love the chance to tell you more.
