**DATA MIGRATION SUPPORT FOR THE #1 CRM IN THE WORLD**

# Salesforce Data Migration

*Are you managing your constituent data in multiple systems? Running 5 different systems to handle your NonProfit Data? Migrate and make use of all your data on one platform.*

# Why Nonprofits Choose The cloudStack Services Data Migration?

Let the cloudStack team support your data migration and make it as painless as possible. Our team has decades of experience, and the sophisticated tools necessary to do the job. They understand the complexities of migrations and are able to deliver the right solution for each nonprofit.

## OUR DATA MIGRATION ENABLES:

- Excellent collaboration among staff with centralized, cloud accessible historical data.
- A better view of entire donor engagement data due to the seamless view of all constituent data.
- Better interactions and engagement experiences for donors and non- profit employees
- Easy analysis of transactional and social information needed to produce constituent insights.
- Time management by allowing you to focus on more strategic projects that are critical to your nonprofit

Improve the efficiency of your nonprofit operations with a data migration - get a 360 degree view of your constituent data.

# Our Data Migration Services

## WHY MIGRATE YOUR CONSTITUENT DATA?

Consolidating constituent data provides a holistic perspective of all supporters involved in an organization, affords seamless and efficient communication with members and supporters and boosts the effectiveness of marketing and fundraising campaigns.

Places we have migrated from:
- CanadaHelps data
- Excel files
- Microsoft access
- Artez
- filemaker
- Sumac
- eTapestry

- CHIMP
- Kindful
- Pobusca
- MS SQL
- GiftTool
- GiftWorks
- Raiser's Edge
- And more, just ask

## DATA EXTRACTION

Work with our team to identify the data you would like to migrate and from what sources. We will also work with you to decide which specific information you need from all sources

## DATA CLEANING AND TRANSLATION

We work with you to clean, de-duplicate and prepare your data for loading into the Salesforce platform

## DATA MAPPING

We will ensure that all records of each source system have a unique identifier and plan the move of your data in to Salesforce. If natively Salesforce does not have a object or field to map your values in to we will customize Salesforce NPSP to support the movement of your data.

## DATA MIGRATION

The cloudStack team will transfer the data from your source system(s) to your Salesforce org. The amount and expected complexity of the data transformation will largely determine the cost of your nonprofits data migration

## About cloudStack Services

cloudStack's entrepreneurial spirit is evident in our team and the creative solutions we build. We focus on helping Nonprofit organizations, large or small, maximize the benefit of the Salesforce Nonprofit Cloud. Salesforce provides Nonprofits with a generous software grant, and cloudStack strives to enable the platform cost effectively.
