

Case Study

# Creating a Salesforce Community for a Law Firm

## The Need

---

Frontier Law Center, based out of Calabasas, California, wanted to build a platform to enable communication and interaction with some of the other law firms the company works with, as well as provide them access to certain data. The goal was for this community to accommodate up to 50 partners.

## The Solution

It was decided to develop a partner community in Salesforce, which the customer uses as their CRM. The customer provided general guidelines, and the Bimit team implemented all of the functionalities and customization they requested.

The platform Bimit developed performs exactly as the customer anticipated. Frontier Law Center highlights that everyone is very impressed by Bimit's final deliverable, noting the high-quality UI. Our Salesforce team was excellent in terms of listening to feedback, implementing changes, and making tweaks along the way.

*"We were impressed by their responsiveness and communication skills, as well as their specific expertise in the areas related to our product. We definitely recommend partnering with Bimit, given the opportunity."*
