

Ascent ERP enabled the integration of the **entire inventory, fulfillment business processes and gateway to the accounting system for Xenial/Sicom**

“We selected Ascent ERP to be a core part of the ecosystem to **handle inventory management and act as an entry-point - and gateway - to our accounting system.**

We had an aggressive timeline that the team over at Ascent was able to step up and help us meet.

Ascent **helped our business transition paper processes** to ones that would work best for Sicom.”
