About Us

The strength and main competitive advantage of Limitless Technologies is the unique team of experts. We developed our skills by working for years at the Manufacturer's headquarters in the USA, the European headquarters in Dublin and by implementing the solutions on the Polish market. The years of experience of our experts translate into practical knowledge of the systems offered and in-depth understanding of the opportunities that each of the offered solutions provides entrepreneurs.

By establishing Limitless Technologies, we have created a space for entrepreneurs, thanks to which they will easily enter the path of digital transformation and ensure the security of their data.

We quickly and accurately recognise the specifics of a given company quickly and accurately. We had an individual approach to customer needs and we believe that properly implemented technology can bring management in any company to a new level.

Awards

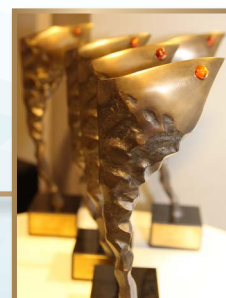

IT Champion 2020

We were awarded the title of **Producer of the Year** in the **Cloud Data Protection** category in the IT Champions 2020 competition organised by IT RESELLER.

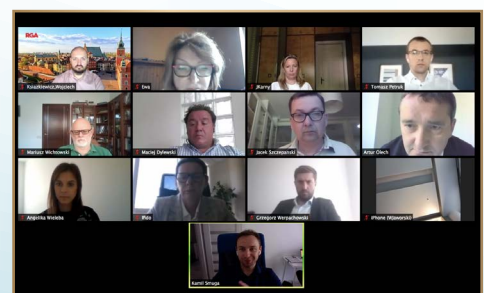

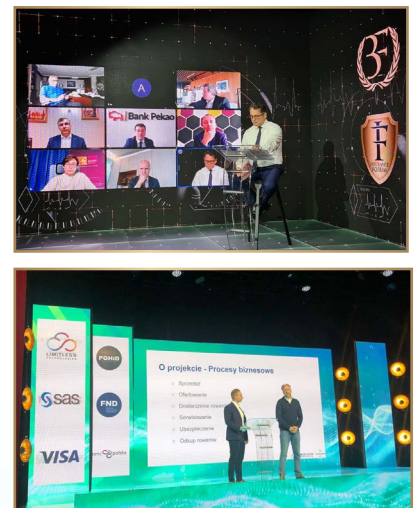

We received a special award for activities in the area of digital transformation during a crisis in the Invest Cuffs 2020 competition organised by the Invest Cuffs Foundation.

Conference activities and advisory boards

We actively take part in industry conferences as a strategic partner of the events. Our representatives conduct substantive presentations, sharing their knowledge and experience and establishing new business partnerships.

Services

1) Salesforce Implementation

Quick implementations - dedicated to small and medium-sized enterprises, allowing for the fast and efficient configuration of selected implementations and the immediate start of the new system.

Implementation of dedicated solutions - large enterprises need unconventional solutions, which means more complex implementations; together with a dedicated team of experts, we offer comprehensive implementations including analytical workshops, project work and testing.

System integrations - we integrate the tools used by the client operating on various platforms to increase the efficiency of his activities.

2) Outsourcing specialists

When our clients need additional support while working with Salesforce tools, we offer the help of dedicated specialists - programmers, architects, project managers and consultants. We provide an individual solution and fast-response support while working on the project.

Benefits:

- Ongoing work with a dedicated specialist.
- Optimisation of project work costs.
- Quick acquisition of a specific expert to perform tasks.
- Effective internal management and knowledge acquisition.

Services continued

3) Training

The Limitless Technologies offer also includes a number of training courses, during which you will learn even more possibilities of the Salesforce application. We will provide substantive classes for companies that already use Salesforce solutions, as well as entities that are relying on their first implementations.

Benefits:

- Ability to learn about Salesforce tools quickly and in-depth.
- Maximising the benefits of implementing individual applications.
- Cost optimisation and reducing the time needed to service implementations.
- Analysis of the current needs of the company and work on the strategy of using the introduced solutions.
