

Time Tracking for Salesforce

Time Tracker for Salesforce is a consumer-driven, global time-and-attendance application. Designed to work on Salesforce, time tracking itself can be within Salesforce, on a web page or on a mobile device. Easy time tracking for Salesforce and non-Salesforce users. All time tracking data is safely and centrally in Salesforce, making it easy and flexible for integration and reporting.

Time Tracker for Salesforce enables companies to invoice faster, streamline payroll and reduce labor costs.

Improve Productivity with a great User Experience

Time Tracker is an innovative app that is available anytime, anywhere, wherever your users work! Available online within Salesforce or on a webpage or on mobile devices. Its simple, intuitive user experience drives user adoption, giving companies the ability to streamline timesheet entry and approval processes. Users and managers can quickly and efficiently enter their time and approve time., allowing your people to focus on their work.

Track time on anything: Let your users enter their time as they are working or after the fact. Track their time seamlessly to Accounts / Contacts / Opportunities / Cases / any object in Salesforce. Different groups within your company can track time to different entities.

Track Mobile phone features: Use the power of your users' mobile devices to track GPS locations, photos at jobsites, customer signatures. Setup automated notifications to update the mobile on new/modified job assignments and updates. Customer address tracking and integration with Google/Apple maps.

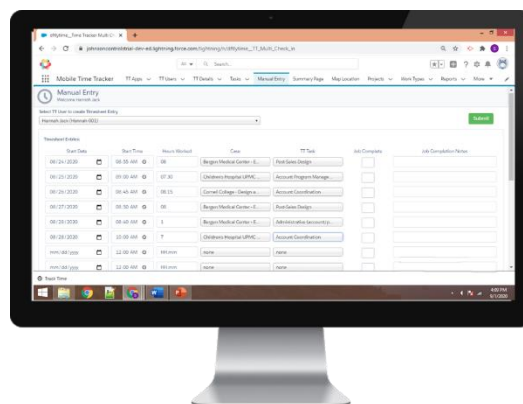

Easy approval management: Internal and customer-managers can review and approve timesheet entries for their team members. Notifications/email alerts to managers for approval.

Key Benefits

- Increase productivity
- Reduce labor costs
- Streamline payroll
- Quick, transparent billing
