

Release Management Automation for Salesforce

AppOps Release automates release management for Salesforce giving developers and admins an easy to use, secure way to quickly manage their data and metadata throughout the entire release cycle from seeding a sandbox to promoting changes to production. Accelerate the process of moving changes through your release pipeline for completely automated, error-free deployments,

Cut Migration Busy Work by 80%

Stop wasting time on manual deployments with Data Loader and Change Sets. AppOps Release lets you move your metadata and entire data schema between environments in a few clicks.

Accelerate Time to Market & Economies of Scale

AppOps Release's automated, repeatable process helps you get changes into the hands of users faster. Templatize any deployment for future time savings.

Improve Governance and Compliance

Automatically track every change made to Salesforce and make it easy for everyone on the team to participate in the release train.

Eliminate Data Security Issues

With AppOps Release you'll never need to export Salesforce data to unsecure CSVs or deal with error-prone VLookups again. Granularly control who can deploy what data and automatically obfuscate sensitive data for an added layer of protection.

Use Developer Sandboxes Like Full Copy

Quickly provision Developer or Scratch Orgs with real production data. Easily see metadata differences between orgs and selectively deploy changes to keep all orgs in your landscape in sync.

KEY FEATURES

CI/CD for Point-and-Click

Our easy to use UI makes managing deployments a breeze. If you know how to build a Salesforce report, you already know how to use AppOps Release.

Visual Org Comparison

See and filter differences between orgs without having to rely on XML.

Version Control for Data

Manage configurations changes in a git repository and easily rollback changes if needed.

Automatic Duplicate Prevention

Preserve record relationships across environments.

DX Ready

Initiate deployments and commits from the command line.

Ready to release 10x faster?
