

The Odaseva Backup and Restore Advantage

#1 Enterprise Backup and Restore for Salesforce

Not all Backup and Restore solutions are created equal. Odaseva is the leading solution designed specifically for enterprises that manage large data volumes or complex data models. With a decade of experience working with the largest, most sophisticated Salesforce implementations in the world, Odaseva is equipped to handle the toughest data management challenges.

10 Reasons to Choose Odaseva for Backup & Restore

- ✓ **True enterprise-grade security.** We do not access customer data thanks to our patent-pending encryption
- ✓ **The most complete backup scope.** We backup all data, files, metadata, and managed packages available via Salesforce APIs
- ✓ **Managed Backup Services.** Our team of experts configures, monitors and tailors your backup plan to your needs and ensures complete coverage
- ✓ **Made for LDV.** Our patent-pending extraction tools mean we can handle the largest volumes of data
- ✓ **15 min RPO.** Your most critical objects deserve the shortest Recovery Point Objective available on the market
- ✓ **The most comprehensive restoration coverage.** We offer multiple restore capabilities from the simplest to the most challenging
- ✓ **One unique interface for all your orgs.** Manage multiple Salesforce organizations from the same interface
- ✓ **We support NA14 and Permaggodon type incidents.** Rely on your Odaseva backups to quickly assess damage extent and rapidly resume critical business activity
- ✓ **Come for the backup, stay for the platform.** Leverage our complete suite of Analytics, Cloud Replication, Sandbox Anonymization, Sandbox Seeding, Archiving, Consumer Rights and more
- ✓ **We wrote the book on Salesforce Backup and Restore.** It's called 'The Complete Guide to Salesforce Backup and Restore' and it's co-written with Salesforce

Proven with Global Enterprises

The Odaseva Backup and Restore Advantage

Customer data is oxygen. Protect your supply.

True enterprise-grade security

- We can never view your data
