

Technology Solutions for Healthcare Organizations and the Communities They Serve

J2 Interactive is an award-winning software development and IT consulting firm specializing in customized solutions for health systems, labs, research institutions, and health information exchanges. Our approach is rooted in the fundamental belief that systems succeed or fail based on how well they serve the people who depend upon them. That includes physicians, nurses, technicians, and administrative staff... but ultimately, it means patients and their families.

Twice ranked #1 for Technical Services in the annual Best in KLAS survey, J2's expertise runs the gamut from technology strategy and best-practices consulting to systems integration, application development, health information exchange, and healthcare analytics. We are especially well known for our work with InterSystems HealthShare and IRIS for Health—since we became an InterSystems Implementation Partner in 2004, **no firm has compiled a longer or more impressive track record of success with InterSystems projects than J2**. We've also delivered dozens of Salesforce solutions that leverage Service Cloud, Marketing Cloud, and Health Cloud to help organizations improve efficiencies, lower costs, and drive better health outcomes across large and diverse populations.

We've assembled a team of more than 150 consultants and engineers in the United States and the United Kingdom, each with many years of experience implementing successful projects of all sizes. We pride ourselves on our personal investment in our clients' goals—particularly in the area of improving patient outcomes—and our commitment to following through until those goals are met.
