

EditorX: Additional information

Custom domain in your org

In case, if you have a custom domain you need to add this domain to “Remote Site Settings”

The screenshot shows the Salesforce user interface for editing a Remote Site. The browser address bar displays `https://mycustomdomain-dev-ed.my.salesforce.com`. The left sidebar contains the navigation menu with 'remote site settings' selected. The main content area is titled 'Remote Site Edit' and includes a description: 'Enter the URL for the remote site. All s-controls, JavaScript OnClick commands in custom buttons, Apex, and AJAX proxy calls can access this Web address from salesforce.com.' The form fields are as follows:

Remote Site Edit		Save	Save & New	Cancel
Remote Site Name	Name Custom domain			
Remote Site URL	<code>https://mycustomdomain-dev-ed.my.salesforce.com</code>			
Disable Protocol Security	☐			
Description				
Active	☒			
		Save	Save & New	Cancel
