

1. Install CronSights Handle Time for Classic\Lightning (WorkIt! ATT) from link:
 - 1.1. Select the User Profiles to install for and click Install

- 1.2. Once the installation complete, click on Done

2. To add WorkIt! ATT Lightning Component to Lightning App, navigate to Setup > Apps > App Manager and select and click Edit at the right side of the Lightning App row;

This should be done for both Standard and or Console.

- Utility Items**
- Navigation Items
- Navigation Rules
- User Profiles
- App Performance (Beta)

Utility Items

Give your users quick access to productivity tools and add background utility items to your app.

Add Utility Item

Search...

- Recent Items
- Report Chart
- Rich Text
- Visualforce
- Custom (0)**
No components available.
- Custom - Managed (1)**
 - Timer

Utility bar is a fixed footer that opens components in docked panels.

To enable the utility bar for this app, add a utility item.

Cancel Save

4. Configure the Utility Item with the following settings and click Save:

4.1. Label: WorkIt!

4.2. Icon: Clock

4.3. Panel Width: 270

4.4. Panel Height: 480

4.5. Start Automatically: Checked

The screenshot shows the 'Utility Items' configuration interface in the Lightning App Builder. The left sidebar lists 'APP SETTINGS' with options: App Details & Branding, App Options, Utility Items (selected), Navigation Items, Navigation Rules, User Profiles, and App Performance (Beta). The main area is titled 'Utility Items' and shows a 'Timer' component. The 'PROPERTIES' section for the 'Timer' component includes: 'Utility Item Properties' with a 'Label' field set to 'Timer'; an 'Icon' field with a clock icon; 'Panel Width' set to '340'; 'Panel Height' set to '480'; and a 'Start automatically' checkbox that is checked. 'Cancel' and 'Save' buttons are at the bottom right.

5. Switch to the Lightning App to verify that the WorkIt! Component is added to the correct Lightning App
