

# OBJECT MANAGEMENT SYSTEMS

## Manufacturing

### WHY USE A SYSTEM?

#### Impact to the Supplier

Object Management Systems can help you track leads and convert them into customers. It ensures that you have the right tools to reach your sales goals.

#### Impact to the Customer

Quicker sales processes since you and your team have access to know which items are available in the inventory. This can be applicable to other industries like food businesses.

### WHAT THIS SYSTEM PROVIDES

#### Internal Supply Chain

The system tracks movement in-system.

#### B2B Leads Management

Have all your leads in one view.

#### Stock Keeping Unit Database

Check details, material code, and category. You can also check the price and availability of the product.

#### Order Process

See the end product, raw materials, and important processes.

#### Inventory Overview

Every department can have access to all the information, as well as the new and slow-moving products.

Powered with the world's #1 customer relationship management (CRM) software, Salesforce.

Avoid challenges in the real-time notification for supply replenishment and monitoring leads.

Designed to get you ready in just six weeks.

We ensure that you'll receive an efficient software setup, guidance, and sessions from a certified expert.

### PREREQUISITES:

- Leads and Accounts Database
- Stock Keeping Unit's database and hierarchy
