

What's the challenge of managing your data today?

Are you a Salesforce user that wants to manage your data in a more efficient way? Day to day, managing your data in Salesforce can be a slow process requiring multiple browser tabs and many clicks to get your data uploaded and saved. Whether you are in Sales, Marketing or a Salesforce Administrator, we all need to find a more efficient way to manage and use our Salesforce data.

Avnio Tables: The New Approach to Managing Salesforce Data

Supercharge your data management to generate insights. Empower users to manage, automate and interpret Salesforce data with Avnio Tables. Cut down on clunky tabs, automate data and increase productivity with an intuitive Salesforce native experience.

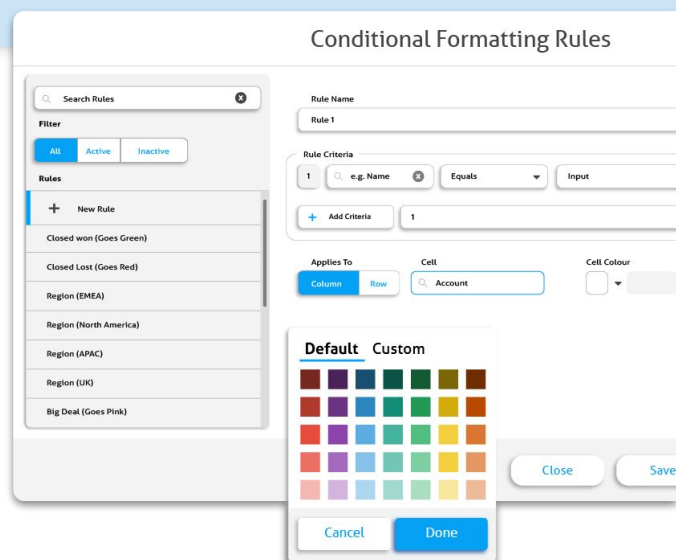

Tables increases productivity and data quality

PRODUCTIVITY

Lightning performance, lightning-fast. Bring your data to life by reducing clicks, simplifying navigation and combining data across multiple objects into a single Table view. Add custom colours to your workflow to increase productivity.

CREATE ACTIONS

Create data actions, whether it's with inline editing, mass updates, bulk actions or even by adding your very own custom actions. Streamline complex reporting processes and get the analytics you need in an organized and actionable view.

INSIGHTS & QUICK REPORTS

The new way to visualise data and generate real business insights. Drag and drop your mouse over data fields and see instant pop up charts. Supercharge your analysis and gain real-time business insight with the latest data.

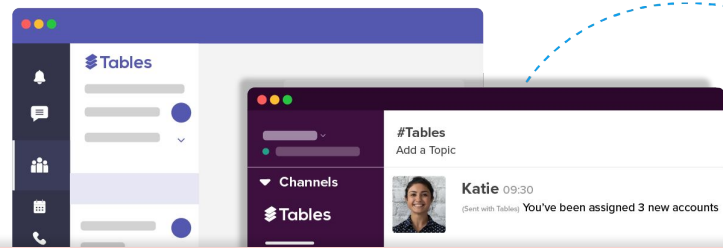

USABILITY

Tables is completely configurable and can be set up quickly and easily for most use case. Create single or multi-tab views to address any use case for Sales, Marketing, Services, Admin and product

"A Game Changer for Salesforce Users"

Tables enhances Salesforce more than any other app I've ever seen, it revolutionizes the Salesforce experience & greatly increases productivity.

Manoj Ganapathy | CEO, Salestrip

Avnio Tables is the only data management solution built for Salesforce Lightning. Giving you lightning performance, lightning-fast.

From our experience, managing data is a pain point for many businesses. As Salesforce experts, we designed Tables to create the best UI for managing your information all within Salesforce. This is the new approach to managing your Salesforce data.

Copy/Paste from Excel	✓	
Dynamic reporting	✓	

Tables Persona's:

- Account Manager
- Service/Support Teams
- Salesforce Administration
- Sales Ops
- CPQ Admin
- Marketing

Key Features

Avnio Tables is a Salesforce Native tool that can easily configure grids and charts to present users with a single view to manage all of the data they need on one screen. Use Tables to manage your workflow across multiple objects, with only the fields and records that are relevant for the task at hand.

Mass Update

Select multiple records in salesforce and update them all at once. No longer will you need to open multiple records in browser tabs and update them one at a time.

Conditional Formatting

Tables lets you highlight the data that is most important for you. Apply colour to your data and quickly identify issues or highlight how well you are selling by highlighting preferential discounts.

Reporting

Create ad-hoc reports on your tables data quickly without needing to configure a report. Choose from multiple chart designs to present your data the way you want.

Grouping

Easily group your data to get a different perspective of the information. Apply multiple layers of grouping to really drill into what you need to see.

About Avnio

Avnio believes in passionate innovation. We deliver the best data management and RFP automation solutions by listening to you and delivering your needs.

Avnio is your best solution to make your company more efficient and win more of the right business.
