Ksquare Journey 2013 – 2021

The Ksquare Group Nearshore Center of Excellence

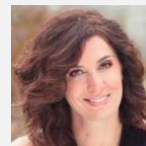

Ksquare set out on a journey to locate top engineering talent, while providing cost effective solutions for clients. We selected Mérida, Mexico over two years ago, and then more recently expanded the center of excellence into the Dominican Republic.

The COE is thriving with over 200 technologists and designers. Our specialized recruiting and training programs ensure we attract, train, and retain outstanding talent.

We have a partnership with the local government and five of the top universities, furthering the development of engineering talent in Yucatan and DR.

"We really appreciate that, sometimes, we need quick support, and The Ksquare Group has the ability to respond. Their resources are efficient and available when we need them. They ramp up to speed fast, so they're able to start contributing very quickly and that's important to us."

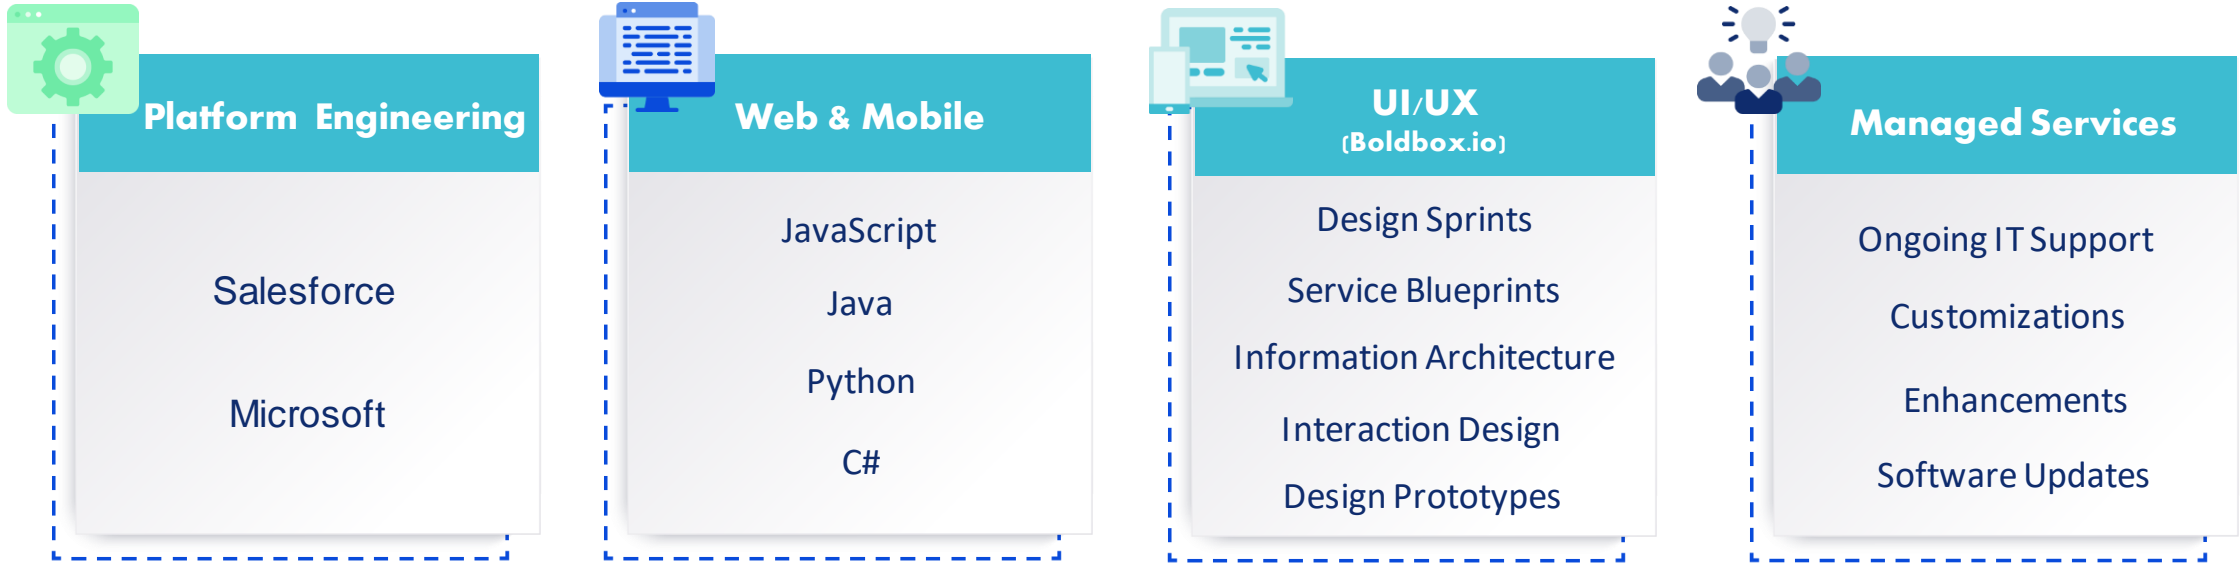

NAOMI HOMRIGHAUSEN
Manager, Digital Applications at
UFG Insurance

"The standard for excellence at The Ksquare Group's nearshore shop in Merida, MX is equivalent to what we have here at the BSA. It's also super convenient that they are in the same time zone. I'm impressed with how well-trained and educated the team is, and I love how eager to learn new things they are. The team in Mexico offers so much value to our partnership."

NORBERT HARASIMIUK
Senior Director, Information
Technology, Boy Scouts of America
