SOLUTION OVERVIEW

Textkernel Staffing and Recruiting Solutions for Salesforce

Boost your recruitment with multilingual resume parsing, AI matching and labor market data.

Faster and more efficient recruiting directly from your Salesforce environment

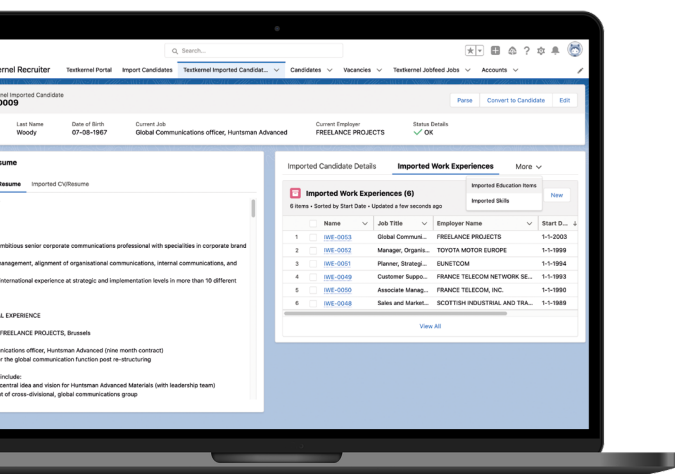

Textkernel Staffing and Recruiting Solutions helps staffing organizations to recruit faster and more effectively directly inside their Salesforce environment. Our easy-to-implement AI-powered multilingual resume parsing, semantic search and match and labor market intelligence enables recruiters to increase placements by directly matching jobs against their own talent pool and match 'silver medalists' against all open jobs in the market. Place every candidate you've ever sourced and easily find new opportunities at existing or prospective clients!

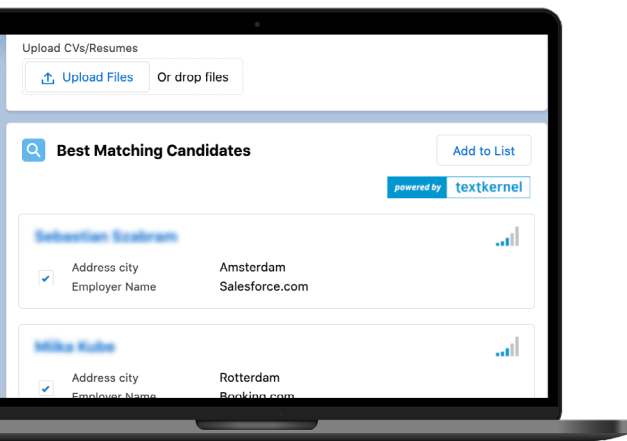

The Salesforce Security Review has approved Textkernel Staffing and Recruiting Solutions for its AppExchange platform so you can be confident that your data is safe and secure throughout the integration.

Accurate, fast multilingual CV/resume parsing

Leverage the power of Textkernel's CV/resume parsing solution and liberate your recruiting team from tedious candidate data entry. Accurate, fast and available in 23 languages, Textkernel's Extract! is an indispensable tool for any recruiting team searching worldwide for top talent.

Surface more relevant candidates in your database

Automatically match from a job to candidates in Salesforce and vice versa with Textkernel's AI matching. A widget will directly show you your top matching results. Feed the matches into your recruiting workflows at the click of a button, or refine the matching criteria to tailor your results before using them.

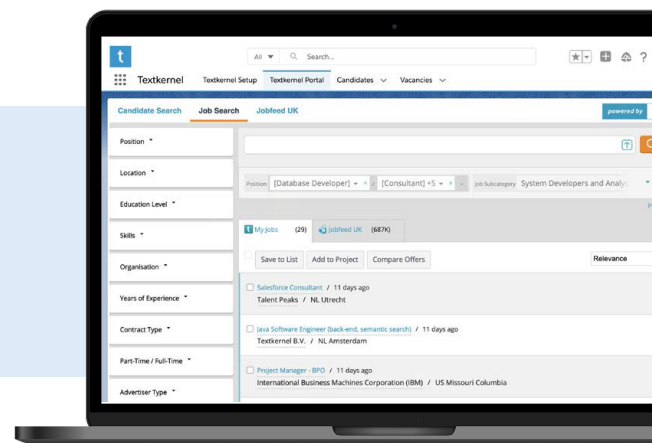

Place every candidate you've ever sourced

Don't lose great candidates that have either applied for roles for which they have not been pre-selected to interview or 'Silver medal' candidates. Based on their application information within your Salesforce environment you can discover relevant open roles in the market for all your candidates. With existing customers or new potential clients.

The entire labor market at your fingertips

Never miss out on open jobs at your existing clients? Jobfeed, Textkernel's labor market intelligence tool, gives you direct access to all open jobs in the market, across 10 different markets and counting. Directly import open jobs, at existing accounts or new potential clients in bulk to your Salesforce and ensure no opportunity is missed.

Textkernel's matching has been tried and tested against competitors and consistently came out #1

Benefit from an easy to implement solution

Free your developers to focus on your core recruiting workflows and let Textkernel manage the data integration. This intuitive app lets you quickly build a custom integration between Textkernel and Salesforce and gives you immediate access to our powerful machine intelligence tools. Textkernel Staffing and Recruiting Solutions offers a flexible data mapping tool, data synchronization infrastructure, configurable user-interface elements, and easy import of public job-posting data.

The key benefits of working with Textkernel

Pioneer in delivering artificial Intelligence-driven recruitment technology

With 21+ years in developing and bringing artificial intelligence solutions to recruiters worldwide, Textkernel is a pioneer in creating and tailoring AI solutions to meet the business needs and unique IT environments of our customers. We are a strong R&D-based organization with strong connections to our academic community and we excel at translating the latest in AI thinking into solutions that work for our customers.

Trusted by 7 out of 10 global
staffing agencies

Best-in-class semantic and deep learning AI solutions for global organizations

Textkernel provides our customers with best-in-class recruitment technology that helps automate time-intensive document processing and candidate assessment. Our technology works across 23 different languages and can be localized to provide language and skill-specific needs. Now your HR team can focus on creating the human and cultural connections with candidates and your organizations, while technology can handle the data processing and assessment heavy lifting.

ISO 27001 certified to ensure your data security

Textkernel takes the security and privacy of our customers' data very seriously. Our stringent data security procedures ensure our customers can be confident that we are handling their data assets with utmost care and consideration. Textkernel is fully compliant with the ISO/IEC 27001:2013 standard. The ISO/IEC 27000 family of standards provides a framework to ensure a high standard of data protection and information security.

You're in good company

Investing in AI technology may seem like a leap of faith, but it doesn't need to be. Textkernel works with over 2,500 HR and staffing organizations worldwide to bring the latest in machine intelligence, Natural Language Processing and deep learning to our customers' fingertips. We work with large, global companies across multiple industries including financial services, energy, engineering, retail and consumer packaged goods, staffing and recruitment, to bring multilingual parsing, semantic search and match and labor market intelligence solutions. Connect with us to learn more about how we help transform the manner in which companies hire and manage their workforce for competitive business advantage.
