

## UST Secure: Assess both your suppliers' and your own cybersecurity readiness

Cyber-Supply  
Chain Risk  
Management  
(C-SCRM)

**ust.com**

The only enterprise platform that gives you a measurable and actionable approach to cybersecurity, regulatory compliance, and cyber supply chain risk. UST Secure utilizes NIST Cybersecurity Framework, NIST 800-53, ISO 27001, and any other major framework or custom framework you require.

# Measurable & Actionable

**UST Secure is the only enterprise platform that gives you a measurable and actionable approach to cybersecurity, regulatory compliance, and cyber supply chain risk.**

Our world-class platform is deployable through Salesforce and allows for continuous improvement to your risk management programs. Using existing standards, enhanced with CMMI (Capability Maturity Model Integration), UST Secure gives you a complete picture of program maturity with respect to the compliance frameworks you use. In addition, you can create your own custom maturity assessments that can be used internally or distributed via portal to assess your suppliers.

#### **With UST Secure you can:**

- Create an internal cyber risk management program for your organization
- Develop an external cyber risk management program for your supplier network
- Utilize the Secure platform for a rich set of compliance dashboards, charts, and reports

#### **What makes UST SECURE unique?**

With world-class cloud deployment using Salesforce, UST Secure utilizes the NIST Cybersecurity Framework, NIST 800-53, ISO 27001, and any other assessment you need, scoring organizational maturity of each. Be able to report on cybersecurity and compliance to your shareholders, vendors, and customers. The platform is designed for ease of use, providing a measurable and actionable approach to compliance.

**Over 50% of all supply chain disruptions in the US are caused by cyber-attacks.**

#### **Features of the UST Secure platform:**

##### **Supplier Community Portal**

Our Supplier Community Portal makes it easy to assess your supply chain risk across complex global supply chains.

##### **Assessment Builder**

Using Minimum Compliance Controls (MCC), the Assessment Builder auto-populates answers across multiple assessments where capabilities overlap.

##### **Compliance Incentive Campaigns**

Build compelling campaigns to motivate your suppliers to higher capabilities.

##### **Supplier Cyber Risk Analytics**

Powerful compliance dashboards & reporting using CMMI-based gap analysis.
