

Oversize/Overweight Permit Application

Our suite of configurable solutions help you fight through the noise and align with your goals in mind.

Applicants can find, submit, check on the status of requests, and receive their permits and inspections using a single digital portal. With outcomes in mind, this solution aims to elevate applicant satisfaction and accelerate the process from start to finish.

FEATURES:

Multi-channel updates in real time to verify application status.

Easy, intuitive interface to submit application and relevant documents.

Real-time access to the approved permit through the portal for obtainability and download anytime.

Automatic notifications for upcoming tasks and next steps in the application review process.

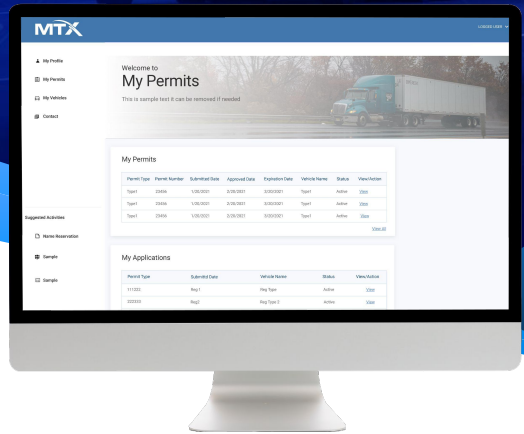

Modular system that is configurable to support multiple types of permit applications and workflows.

Business rule engine to automate internal processes and allow staff to focus on more complex applications

Automated route generation with real-time route updates based on the type of permit and load with infrastructure restrictions, lane-closures, incident management and weather updates

BENEFITS

An easier, faster, more reliable, and cost effective solution.

Reduce carbon footprint by digitalizing the process.

Increase employee production.

Create more applications and revenue by serving applicants faster.

Faster and more reliable process to improve agency efficiency.
