

In a **work-from-anywhere** world, engage and build community through **interactive, attend-from-anywhere** events in Slack.

Whether your **tech customer** decides to host an in-person, virtual, or hybrid event, Slack should be at the center of it all. A **digital-first experience** with Slack connects all attendees - regardless of location. Slack becomes the event space where learning 📖, celebrating 🎉, networking 🤝, contributing 💡, and community building 🏡 happens.

Slalom has implemented large-scale internal and external corporate events—hosting more than 100K attendees with Slack at the center of it all. We have expertise in both technical implementation and attendee adoption/engagement strategy.

Our portfolio of solutions are based on event and persona type and we take a collaborative approach when working with our clients to design a fun and memorable event experience.

Industry: Technology

Experts

More than 50 global consultants credentialed with Slack Admin & Developer certs

100K
