

Enable Orders

To install the App you need to have Orders enabled in your Salesforce Org. **HOWEVER** once the App has been installed, Orders can then be disabled if required.

Note: Unfortunately, Salesforce cannot remove this requirement before the App can be installed.

The screenshot displays the Salesforce Setup interface. At the top, there is a navigation bar with the Salesforce logo, a search bar labeled 'Search Setup', and several utility icons. Below this, the left sidebar shows the 'Setup' menu with options for 'Home' and 'Object Manager'. The main content area is titled 'Order Settings' and features a checkbox labeled 'Enable Orders' which is currently checked. Below the checkbox are 'Save' and 'Cancel' buttons. A 'Help for this Page' link is located in the top right corner of the main content area.
