Salesforce
License Tracker

Manage all your license in one place

CONTENTS

WHAT IS A SALESFORCE LICENSE TRACKER?

Checking the active user license is easy now. DS Salesforce License Tracker places information of all active users in one place. The license tracker helps in finding out the licensed users and their activities. Only admin has a right to give permission and make users. The system automatically updates the count whenever a new member adds or deactivate the account. It also automatically removes the user package after account deactivation.

Active Users Report

Record Count

12

Profile: User License: Name

- Analytics Cloud Integration User
- Chatter Free
- Force.com - Free
- Guest User License
- Salesforce
- Salesforce Platform

TYPES OF
LICENSE TACKING

DS Salesforce Licence Tracker is available on App Exchange. This salesforce application helps in managing all licenses placed in Salesforce.
There are two forms of license tracking in this system:

- System: All the available and purchased licenses are available in the system.

- Permission set: The new add-ons licenses are shown in the permission set.

The DS Salesforce Licence Tracker tracks the running licenses.

GET UPDATED INFORMATION ON LICENSE

DS Salesforce License Tracker is easily available on AppExchange. A dashboard is designed to give analytical & detailed insight into the active users and their activities.
