SALESFORCE TECH ASSESSMENT AND BLUEPRINT

Simplify and optimize your Salesforce architecture.

Avoid pressing the reset button on your Salesforce program and instead take a thoughtful evaluation. Many organizations have difficulty rationalizating their data with their business objectives or harmonizing Salesforce automations for their end state vision. Other common challenges include

- Lack of org strategy
- Heavy customization
- Absence of MDM or integration strategy
- Poor alignment between IT and business
- Distributed security schemes across applications

Simplus' advisory practice is offering tech assessment and blueprint services to mediate these types of challenges. Through a typical enagement, you can expect to unlock greater optimization of your Salesforce program, reduce technical debt and IT overhead, simplify your architectural landscape, and gain a greateer understanding of any dependencies or obstacles to the scalability of your system.

Reach out and connect with an expert at 1.833.SIMPLUS or info@ simplus.com to learn more about Simplus' tech assessment and blueprint services.

VALUE FROM TECH ASSESSMENT AND BLUEPRINT

We realize that your goals may be Salesforce specific or they may reach across your entire technology landscape. Simplus brings flexibility to ensure your business and IT goals are met in the most efficient way possible:.

Salesforce-specific	MDM / Integrations	Holistic Technology Landscape
Simplus can focus on your Salesforce specific goals with Salesforce Technical Architect expertise.	Expand capabilities to include MDM and Integrations and consider the entire technology landscape that touches Salesforce.	End-to-end capabilities across all infrastructure and technology
