Up and Running—Plus projects are scheduled in a matter of a few weeks and implemented in about 1 month depending on scope.

PRICING

Half Day Business Review
\$500

Up and Running—Plus engagements **\$9,995**

Congratulations! You have made a great decision to run your business using salesforce.com, the world CRM software leader. To maximize your investment, leverage the skill and experience of cloudconsulting to get it running.

At cloudconsulting, we are different and better in how we get you up and running on salesforce.com. Here's How.

Unlike other consulting companies that charge by the hour, cloudconsulting offers fixed price engagements. We do this by engaging with you for a one day assessment where we jointly determine what your needs are. Then we quote a fixed price to get that work done.

This assures you that you get up and running as quickly as possible. And that you know what the costs will be.

Start With Business Review

All cloudconsulting engagements start with a business review. We meet with you for a one-day session where we jointly will map out your goals for salesforce.com and review the business processes that will be impacted such as sales, marketing, and support. The result is a clear roadmap of how to get there and a fixed price from us on what it will cost.

Salesforce Setup & Customization

The Business Review results are used to setup and customize all areas of salesforce.com so you can start using it. Depending on your focus, this could include Accounts, Contacts, Leads, and Opportunities.

Initial Training

We will provide a review of the entire system as configured for you, then train you how to use it in your day-to-day operations. We do this online, but also train in-person when necessary.

30-Day Checkup

After 30 days we schedule an online session where we review where you are on the road to success and help you make any adjustments necessary.
