

Oodrive Sign for Salesforce®

Close deals **faster** with **the most secure** e-signature

The **Oodrive Sign** application seamlessly integrates with Salesforce, so your sales teams can easily send, track and sign contracts without leaving the Salesforce environment and with the highest levels of data security. Oodrive Sign for Salesforce is fully eIDAS compliant, so that your e-signatures are enforceable across the EU and worldwide.

Easy, fast integration

Use Oodrive Sign for Salesforce to start your e-Signature process directly from your Opportunity, Contact, Account or custom entity. Define the signature transactions, select the perimeters to share the document in, and the agreement template to be used for the transaction. Select the documents to be sent for signature from your Salesforce document library, as well as the annexes, recipients, and configure their signature modes directly in Salesforce. Once a transaction is complete, you can follow its status within Oodrive Sign for Salesforce interface.

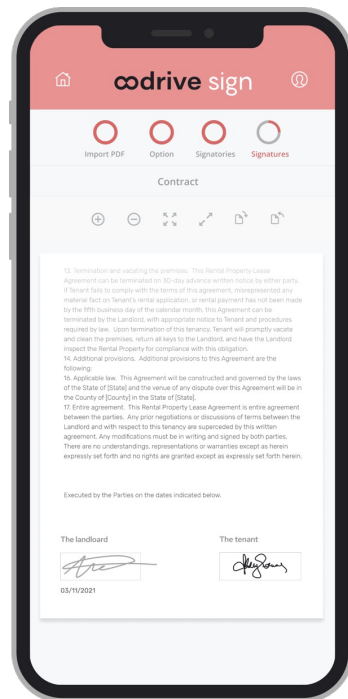

Oodrive Sign for Salesforce **remote signing process**

Compliant and secure

Allocate roles between the administrator and your sales team, for clear control over the signing process. Activate Oodrive Sign for Salesforce on the desired entities, select users who are allowed to use the app and define their permissions, manage your contract templates, limit minimum or maximum number of signers if needed.

Oodrive Sign meets the most rigorous regulations and standards, including eIDAS compliancy, so that your e-signatures are enforceable across the EU and worldwide. Oodrive Sign offers the three levels of guarantee provided by the eIDAS Regulation: simple, advanced, and qualified.

Key capabilities

Simple workflow

Oodrive Sign for Salesforce offers a 4-step workflow, from document selection, annexes and document attachments, recipients, and signatory role selection, to document sending. All directly from the Salesforce interface.

Control the whole process

Allocate roles in accordance with each user's profile, for fool proof workflows, full oversight, and clear control over the signing process.

Deliver a better signing experience

Recipients can sign from any device in just a few clicks, even if they are not connected: signatures made offline are automatically synchronised as soon as a connection is re-established.

Security you can trust

Oodrive's technology, people and processes are independently certified and permanently maintained to the industry's most stringent security and sovereignty classifications (ANSSI SecNumCloud, ISO 27001, ISO 27701, EUCS, eIDAS).
