What is TwoCanConnect for Real Estate?

Our Features Include:

Simple integration for Salesforce and Real Estate Platforms.

TwoCanConnect for Real Estate has been built from the ground up by Salesforce users, for Salesforce users.

Our connector allows you to create and sync enquiries between Salesforce, REA and Domain. No more having to enter enquiries into your CRM manually.

You can link multiple agencies to sync data on projects, listings, enquiries, agents and agencies.

TwoCanConnect for Real Estate works Salesforce Professional, Enterprise and Unlimited Editions.

Multiple Agencies

Add one or multiple agencies from REA and / or Domain.

Sync Enquiries

Any new enquiry created in REA or Domain will automatically sync to Salesforce as a lead every 5 minutes.

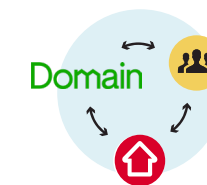

Sync Listings

We create all of your listings in Salesforce and link them with the enquiry. Use reporting to understand how popular your listings are.

Sync Projects

You may have listings that are a part of projects. We sync projects and link them to both the listing and the lead.

Sync Agents

The agent data will also be synced from REA and Domain. You can run lead assignment rules to assign new enquiries.

Sync Historical Enquiries

You can sync any historical enquiries from the last 90 days from both REA and Domain directly to Salesforce.

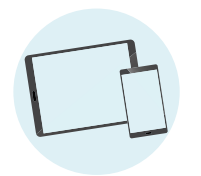

Custom Field Mapping

Allow custom field mapping for all objects created by our application.

Lightning Experience

Because TwoCanConnect is built in Salesforce, it is 100% lightning ready!

Responsive Design

Manage all your enquiries in Salesforce from your mobile / tablet.

Works with Salesforce

Professional, Enterprise and Unlimited - TwoCanConnect works with them all!

Sync Salesforce and Real Estate

Why do you need TwoCanConnect for Xero?

Tired of having to manually input enquiries into Salesforce?

TwoCanConnect for Real Estate solves the disconnect between your REA and Domain accounts and Salesforce. Your team might be dealing with many enquiries per day from both networks. If you use Salesforce as a CRM, it can be laborious to manually enter these enquiries, link them to listings and projects and manage them through the enquiry and sales cycle.

With TwoCanConnect for Real Estate, we take all the manual work out of your enquiry management. Once configured, all enquiries from one or multiple agencies will create in Salesforce as a new lead, link to a listing and / or a project and an agency. You can then run lead assignment rules in Salesforce to allocate the enquiry to the right agent.

The enquiries sync every 5 minutes between Salesforce and the Real Estate providers, meaning you can keep on top of any enquiries in no time at all!

Because all of the enquiry, listing and project data is in Salesforce, you can create reports and dashboards showing any relevant information in Salesforce for a 360 degree view of your customers.
