API Key Guide

How do I get an **API Key** for Domain?
What do you need to get Domain working with TwoCanConnect?

- ✔ Domain Developer Account
- ✔ Client ID
- ✔ Client Secret
- ✔ Agency ID(s)

STEP 1

Get your Redirect URI

- After you have installed TwoCanConnect for Real Estate, go to the home page of the TCCRE App
- Go to the 'Help' Tab and note under the Domain section your Redirect URL (minus the full stop)

STEP 2

Register for a Domain Developer Account

🌐 <https://developer.domain.com.au/>

- Click 'Get Started' and then sign up for a Developer Account

STEP 3

Create a new project & add credentials

- Click 'Projects', then click 'Create Project'.
- Enter a Project Name : 'TwoCanConnect Salesforce API' and save the changes.

STEP 4

Create Client Credentials

- Click on the 'Credentials' tab and click 'Create OAuth Client'.
- Click 'Authorisation Code' and then add your Redirect URL from Step 1. You need to enter it and then click 'Add' to apply the URL. Click 'Create Client'. Note down the Client ID.
- Under 'Secret Description' enter 'Salesforce API' and click 'Add'. Note down the displayed secret.

STEP 5

Add API Access

- Click on the 'API Access' tab.
- Click 'Add API'
- Add the 'Agents and Listings' Basic / Free API
- Add the 'Listings Management' Production API - it will prompt you to request access to this API
- You can continue by clicking 'Yes' and you should see a message that Domain will contact you.

STEP 6

Wait for a Response

Domain will take a few days to reply and provide access to your production Listing Management API. You may need to provide them with additional information about your Agency to have the API enabled. Please let them know you are only using the API to 'Pull' data to your CRM and you are not pushing anything back to Domain. If you have any issues with Domain please contact TCC Support.

Why do you need TwoCanConnect?

Tired of having to manually input enquiries into Salesforce?

TwoCanConnect for Real Estate solves the disconnect between your REA and Domain accounts and Salesforce. Your team might be dealing with many enquiries per day from both networks. If you use Salesforce as a CRM, it can be laborious to manually enter these enquiries, link them to listings and projects and manage them through the enquiry and sales cycle.

With TwoCanConnect for Real Estate, we take all the manual work out of your enquiry management. Once configured, all enquiries from one or multiple agencies will create in Salesforce as a new lead, link to a listing and / or a project and an agency. You can then run lead assignment rules in Salesforce to allocate the enquiry to the right agent.

The enquiries sync every 5 minutes between Salesforce and the Real Estate providers, meaning you can keep on top of any enquiries in no time at all!

Because all of the enquiry, listing and project data is in Salesforce, you can create reports and dashboards showing any relevant information in Salesforce for a 360 degree view of your customers.
