# WHAT IS DS ROUTE OPTIMIZER?

The route planning is a most vital element for any logistic or supply chain business to deliver things on time or early before the time. Get the shortest path to reach your destination. The application anticipates all factors like location and distance and then shows the time window for the delivery.

The app shows:

- Turns intersecting along the route
- The nearest driver for the route
- Traffic condition
- U-turns and cuts

Route planning helps to calculate and anticipate the most efficient route. It enables the drivers to reach their destination on time. The application helps in making last minute delivery.

# BENEFITS OF DS ROUTE OPTIMIZER APP

Logistics requires a lot of route planning to deliver the product on estimated time. The use of an application brings many fruitful results to the company:

## Deliver Products On Time:

Deliver products on time: The DS route optimizer app enable timely delivery. It cuts down the travel time by suggesting the suitable route plan. It further helps in maximising the daily order delivery.

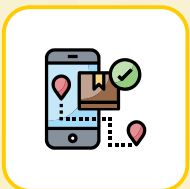

## Save Every Mile:

A bigger route increase the cost of fuel and contribute to the extra mile running of a fleet or a vehicle.

## Planning Saves Your Time:

The big companies have schedulers to plan the delivery route. The DS route optimizer app is a solution for every problem by suggesting appropriate route. The schedulers have to define the constraints of the software, and the rest work will be done by the tool.

## Tracks Everything:

Sometimes, drivers might not deliver the parcel due to inappropriate routes and avoid specific places. Every product will be delivered at home safely and on time with the DS route optimizer app. The cloud suggested all the best routes to reach the defined destination in minimum time.

Companies can grow, expand and make users satisfied with it. The application benefits in:

- Deliver more orders in a day
- Save every mile
- Help in planning the best route

Decide your path – reach it on time with DS route optimizer app.
