

"Our RAF has increased significantly. We are now aware of diagnoses at the point of care and this is improving our quality of care and accuracy of coding. Also, the level of service that ForeSee provides is exceptional. ForeSee has been very responsive with regard to requests for additional training and when asking for ways to improve utilization by our providers. **The natural language processing is second to none,** and the accuracy of the negation is what surprised me the most. There are few, if any, software programs that are as easy to use or as accurate."

Dr. Wade Brosius
Medical Director, PMSI
Royersford, PA

"We chose ForeSee Medical because it uses natural language processing to scour the data and reveals all the data that's relevant. And beyond that, it presents what hasn't been reported yet this year. It's an integral part of our workflow for Medicare Advantage patients. We can capture the health state of the patient with all of the data that ForeSee presents. It finds everything and informs us whether we need to take action on it, and **it doesn't miss anything.** We now have time to do a thorough look at every patient, rather than just the last note."

Jim Moore
Director of Operations, BeWell Clinic
Weslaco, TX

"ForeSee Medical allows any provider at any level of scale to create a robust data and revenue integrity system at a reasonable cost with a **fantastic return on investment.** The reason is not just because of how effective the system itself is, but because of the systems it replaces that are expensive, inaccurate and that can actually put the user at increased risk for revenue audit."

Dr. Tom Davis
Consultant on Full-Risk Insurance Contracting
St. Louis, MO

"ForeSee Medical with artificial intelligence is easy to use for my HCC coding. It not only identifies accurate coding opportunities that are buried in PDF documents from hospitals, specialists, and my EHR, it improves patient quality of care. **I highly recommend ForeSee to anyone that wants to increase the profitability of their Medicare risk contracts."**

Dr. Scott Yarmark
Family Practice of Jeffersonville
East Norriton, PA
