

WHERE INSIGHT MEETS OPPORTUNITY[®]

Fast and Accurate Risk Adjustment

It's simple, using artificial intelligence (A.I.) like NLP and machine learning we discover diseases from the text notes and EHR data you use every day. Then, we empower you with insightful HCC risk adjustment decision support when you need it most.

Any Workflow

Prospective
At the Point of Care
Pre-Visit

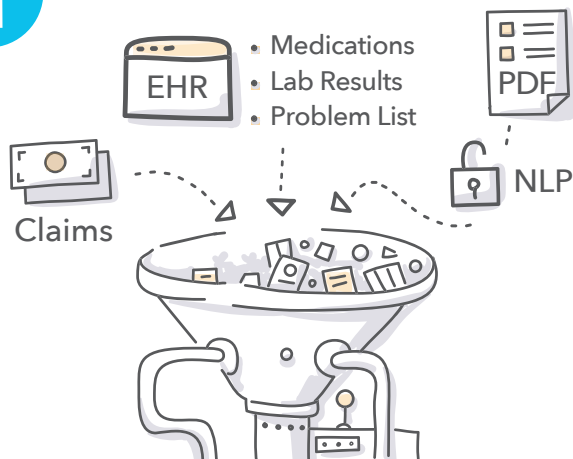

Retrospective
Powerful Reports
Insightful Dashboards

Recapture
Alerts for No Current Evidence
Considers Disease Persistence

HERE'S HOW ForeSee ESP works

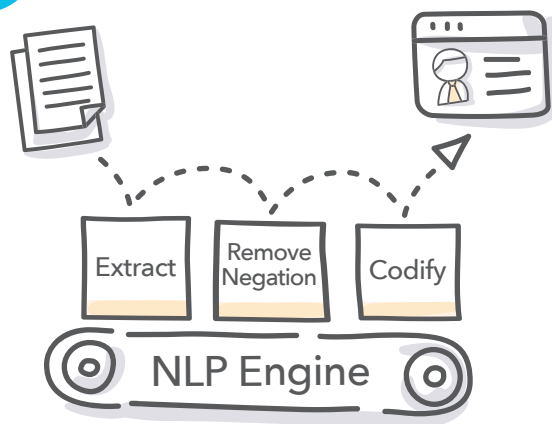

1

Interoperable

Works with Standard EHR Formats
Simplifies Confusing Codes

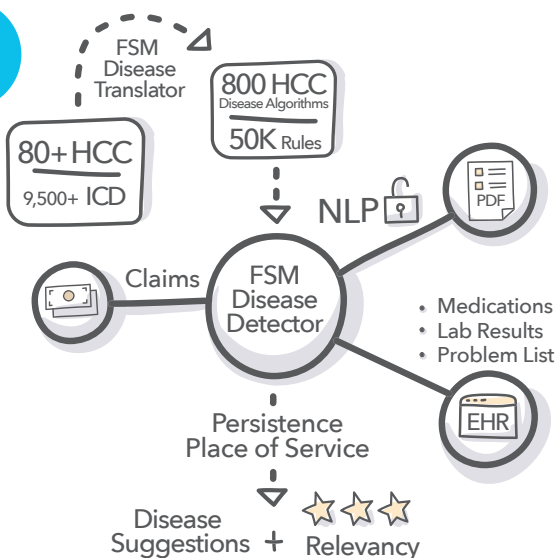

2

Smart NLP

Understands How You Speak (20k Terms)
Negation Engine (500 Triggers & 97% Accurate)

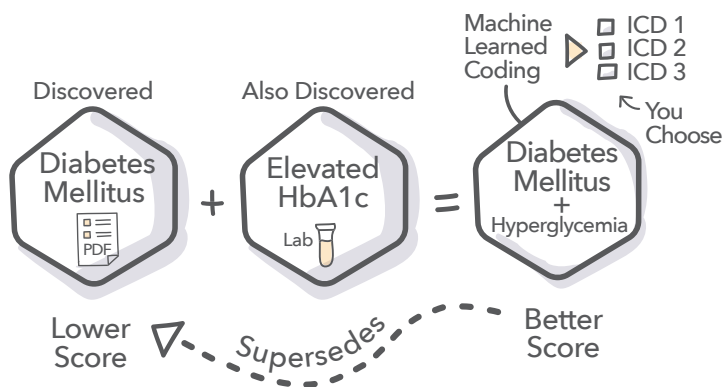

3

Disease Detector

Translates HCC to Disease
Proprietary Disease Algorithms (50k Rules)
Generates HCC Clinical Decision Support

4

Follows the HCC Rules

Hierarchical Logic Built In
Automated RAF Scoring
Machine Learned ICD Coding Support
