COMMUNITIES

Why Us? We Go Above and Beyond

When you work with us, you don't just get a single person assigned to assist you - you get an entire team across various time zones to work around your schedule. We come with a wealth of Salesforce knowledge, business experience and the the grit to get stuff done!

If the workload is light, we utilize that time to clean up duplicates, enhance UX design of the screens, and perform health checks + org optimization. We also ensure transparency about how we use your time by sending out weekly reports.

Client Case Study

Client

The Pennsylvania Virtual Charter School (PAVCS) is an online K-12 public cyber school offering a home-based, student-centered education for students in Pennsylvania.

Challenge

A fast growing online school, PAVCS needed help developing an efficient way to track information about students, teachers, and administrators within their Salesforce system.

This included assistance with managing various information fields to include enrollment information, billing due dates, and historical payment information.

Solution

Client Cloudcare was brought in to assist PAVCS, customizing record types and Accounts to effectively track students, teachers, and providers, along with various other entities. In addition, we created innovative automation tools that provided users the following efficient processes: select providers based on areas of expertise, utilize background records to total the amount of time a student is entitled to services, accurately track and assign due dates and meetings, and track life cycle of yearly IEPs.

Results/Today

PAVCS was able to effectively work almost entirely out of Salesforce for the entire school year with very high user buy-in. Ultimately our efforts reduced user CRM work hours for their administrators by over 20%, enabling them to better serve their students in this top performing school of over 3,300 students.
