

Skribble factsheet

Signing electronically with legal validity in the EU and Switzerland

In brief

Contracts should no longer have to take the detour via printer and paper in order to be signed legally: Skribble AG is a leading European e-signing service with offices in Zurich (Switzerland) and Karlsruhe (Germany). Skribble provides legally valid electronic signatures for every type of document – even if the law requires a handwritten signature. Security and legal validity should not come at the expense of simplicity: every company, regardless of size and technological experience, is able to benefit from the far-reaching advantages of the digital transformation. Skribble offers a secure, legally compliant and scalable e-signing solution to solve the digital transformation headache for companies of all sizes.

Skribble factsheet

Signing electronically with legal validity in the EU and Switzerland

Why sign with Skribble?

One supplier – all scenarios covered

E-signing might be complex, but it will never feel so for you: Skribble aggregates and continuously updates all components you'll need for smooth e-signing – including identification. No 3rd party contracts or services are needed.

European security standards & Swiss hosting

Your colleagues from legal and compliance will back you up: Skribble is GDPR-compliant, ISO 9001 & 27001 certified and securely hosted in Switzerland. So you can be sure that your data is safe.

Legally valid in any case. Really!

E-sign any document with full legal validity – even contracts requiring the handwritten signature. We cover all 3 e-signature standards defined by the EU and Swiss law. So no matter the use case – you'll have peace of mind with Skribble.

You can get started within minutes

Get results immediately with no strings attached. You can start e-signing today– to quickly and easily see how your team can benefit from Skribble. No upfront fees, installations or additional hardware needed.

Delight colleagues and customers alike

Playing it safe should not come at the cost of productivity, speed or joy. That's why we made Skribble self-explanatory and easy-to-use – for a smooth onboarding, happy colleagues and delighted customers.

Easily integrated into your existing systems

Skribble is designed to fit seamlessly into your existing systems and workflows. No frills, just e-signing (which we've perfected!). And you'll delight your tech team with Skribble's simple API and ready-to-use plug-ins.
