IPfolio is an IP US based company with a R&D office in Vienna, Austria. They provide next-generation, cloud based, IP management software, that helps companies around the world create and manage a corporate IP Portfolio.

IPfolio is an ISV Partner and hired Nubessom Consulting as their PDO Partner to support them during the the the full cycle development of an Appexchange top class product. Solution Architects and Developers immediately started working on the project.

PROJECT OVERVIEW

Full cycle development of an ISV App.
IPfolio needed a robust and efficient Appexchange product. Not only support them in the development but also marketing that App in the Appexchange ecosystem. The challenge consisted in:

• Continuous product feature development.
• Troubleshooting and bug fixing during new customer on-boarding.
• Classic to Lightning migration, including creation of new lightning components and implementation of communication between Lightning and Visualforce pages.
SOLUTION

Some of the key parts of our solution consisted in:

• Lightning database components are used to display Actions/Tasks and all of the related data new modern way.
• Lightning Data Service is implemented for custom objects to provide fast way for editing or creating new records.
• Layout and overall view has been redesigned according to best practices of UI development and Lightning Experience guidelines.

FEATURES

Database overview

Fast Editor Tools

Modern UI

CLIENT COMMENTS

Vienna, Austria

Harald Mayer
Director, product Development at IPfolio

*"A truly awesome partner to work with.
Working with Nubessom has allowed us to reinforce our in-house development team with very experienced and highly skilled developers with outstanding experience in solving Salesforce specific challenges when the success of our Salesforce based product required us to quickly scale our development resources.
Their developers quickly adopted our SDLC and started to add value from day one. Reliability and strong communication is a given. A truly awesome partner to work with!"*
