Buzz Past the Competition

- **100% Native to SalesforceTM** – BundleBee works on quotes and opportunities. Apply native Salesforce automation tools, such as flows, for price manipulation.
- **Easier Product Configuration** – Add your products on one page within Salesforce and save yourself the time wasted waiting on multiple tabs to load. Manage all products and price books on the BundleBee Product page. BundleBee keeps everything in sync.
- **Smarter Pricing Decisions** – Empower your team with the knowledge of how individual bundle lines impact revenue and access the details you need to make intelligent pricing decisions.

Manage Pricing with Unbelievable Ease

- **Swift Creation of Product Bundles** – Bundle anything with a cost, inventory and non-inventory items (BOM, paperwork, discounts, etc.), using an efficient widget. Eliminate a manual-entry step for your sales team by selecting the price book at configuration.
- **Quick & User-Friendly Setup** – Take charge of your product management with a seamless, DIY setup. You'll own the hive.
- **Sting the Competition, Not Your Wallet** – Bundling should be a breeze, and we make it simple with only the essential features. No unnecessary complexity and no exorbitant price tag.

BundleBee satisfies most pricing needs. However, if you have a request that is not covered, our US-based support team is happy to review your needs and develop a custom solution.
