The screenshot shows the installation page for the 'Asynchronous Process Manager Creator' app. It features three radio button options for installation scope: 'Install for Admins Only', 'Install for All Users', and 'Install for Specific Profiles...'. The 'Install for Specific Profiles...' option is selected. Below these options are 'Install' and 'Cancel' buttons. A section titled 'Select Specific Profiles' provides instructions on security settings. At the bottom, there is a table to set access levels for various profiles, with a dropdown menu set to 'Full Access' and a 'Set' button.

Install Asynchronous Process Manager Creator
By

☐ Install for Admins Only
 ☐ Install for All Users
 ☒ Install for Specific Profiles...

Install **Cancel**

Select Specific Profiles

These security settings determine access to the custom objects and components installed in the package. It doesn't affect permissions for existing objects.

i Standard profiles (including the Read-Only profile) don't receive access to any installed custom objects. Because permissions are not editable for standard profiles, you must clone your profile to grant access.

Set access level for all profiles to
Full Access

Set

Profile	Access Level
System Administrator	Full Access (Your profile must have full access to the package)
CSM ROW	Async Standard User
CU Read Only	Async Standard User
Channel Manager	Async Standard User
Channel Manager old	Async Standard User

2. After installation go to tab **MBA Settings**

2.1 Click button: Start Scheduler
