

DISCOVER THE ABSTRAKT DIFFERENCE

ABOUT SYNC PAYMENTS

Sync Payments is a credit card processing company and one of Abstrakt Cloud Solutions' first clients. They specialize in providing flexible solutions to synchronize your payment systems across all platforms.

ABOUT CLOUD SOLUTIONS

Abstrakt Cloud Solutions was founded by Abstrakt Marketing Group, which has spent the last 11+ years providing marketing and lead generation services to organizations across the US. As a Salesforce Partner, we guide our clients through implementation, training employees, and providing ongoing support.

Problem

Sync was using several different systems to keep track of their partner's revenues, partner shares, and employee commissions.

Solution

Abstrakt Cloud Solutions built functionality in Salesforce for Sync to house everything in one place. We created custom objects for them to upload monthly transactions and formulas to automatically calculate their partners' shares.

Result

We built out community portals to allow partners to access the data, as well as created reports and dashboards to showcase the most important metrics on revenue. We developed custom objects and flows to calculate employee commissions on a monthly basis.

Sync now enjoys automated and streamlined processes that save the time otherwise spent manually entering data rather than focusing on other business essential tasks.
