

Manage Salesforce Security Posture and Secure Your Data

Salesforce is an incredibly powerful system, customized and relied upon by teams in nearly every department across organizations. As your Salesforce environments live and grow, access control can become a tangled web. Salesforce admins and Security teams alike need to understand who has access to what, and why, with confidence.

Effectively managing the Salesforce platform requires staying up-to-date on the latest releases and functionality, as well as ensuring that the proper security measures and processes are in place. AppOmni's industry-leading SaaS security experts have deep knowledge of and expertise in managing and protecting Salesforce.

"AppOmni is uniquely positioned to provide businesses with the tools and visibility needed to securely manage the use and data access of SaaS environments. AppOmni helps ensure that clients can consistently maintain best-in-class SaaS security throughout their organizations."

— Robert Keith, Managing Director, Salesforce Ventures

AppOmni mitigates Salesforce security risks by providing Security, Compliance, and IT teams with the proper tooling to effectively manage security across all Salesforce environments.

Solution Benefits

Identify Incorrect Permissions and Configurations

AppOmni delivers unparalleled visibility in minutes. Review more than 225 Salesforce configuration settings and more than 350 system permissions in one place to ensure accurate configuration and make changes with confidence.

Leverage Out-of-the-Box Security Best Practices

The powerful AppOmni modeling engine allows you to write permissions and access rules without having to understand or review each Profile or Permission Set. AppOmni helps make sure your Salesforce configurations never deviate from your business intent.

Get a Comprehensive View of Your Salesforce Environment

AppOmni delivers expert-built default policies and metrics. You can compare how data access has changed over time for specific users or roles, and prove compliance with regulatory standards, including SOX, SOC 2, ISO 27001, and NIST.
