

Get a Salesforce Security Posture Executive Findings Report

Is your Salesforce environment susceptible to breaches and data exposure? Find out what can be detected with a Salesforce Security Posture Executive Findings Report.

This free report, courtesy of AppOmni, reveals:

- Security risks and findings across infrastructure and integrations, as well as identities and access
- Connected 3rd party apps and SaaS-to-SaaS connections, including unapproved apps
- Compliance violations and overall adherence to compliance standards

Enhance Security

AppOmni can quickly identify SaaS data exposed on the public Internet and other critical data leakage gaps. Our findings reveal the data leakage gaps that exist today that easily lead to a potential breach, such as data access misconfigurations and over-provisioned integration accounts. AppOmni is the only SaaS security solution that can accurately identify data leakage gaps.

AppOmni's findings show that most organizations have experienced the following:

99%+

Have Data Access Misconfigurations

95%+

Allow Over-Permissive 3rd Party Apps

55%+

Have Exposed Data to the Internet

35%+

Violate Security Best Practices in SFDC Deployments

Benefits

- Understand the state of your Salesforce security posture with a full investigation led by AppOmni
- Identify opportunities to better protect Salesforce data based on the most likely gaps
- Prove security effectiveness across your Salesforce ecosystem
- Obtain evidence needed to demonstrate compliance
