And it's helping businesses like yours:

Reduce payment
processing costs

Speed up payment
processing times

Increase payment
security

Get more value
from Salesforce

How LinvioPay Changes the Salesforce Payments Game

At most businesses, payment processing involves several steps, multiple handoffs, and an array of software from different vendors.

Salesforce Payments solutions from Linvio and other similar companies speed up the process, reduce handoffs, and bring payment data into Salesforce.

But only LinvioPay offers built-in gateway and processing technology to let you take the next step and turn your Salesforce solution into a true, one-stop shop for payment management and processing.

LinvioPay eliminates the need for a separate payment gateway and processing vendor, meaning you can:

- **Simplify your payment management tech stack & increase uptime**
- **Trim your payment management vendor list to two: Salesforce + Linvio**
- **Reduce overall payment processing costs**
- **Eliminate processing delays and get faster access to funds**

LinvioPay Features You'll Love:

-  Payment processing for over 135 currencies and 25+ countries
-  Automatic fraud detection & prevention
-  Secure payment data visibility in Salesforce
-  Instant bank account connection and authentication
-  Rapid ACH transfers
-  Invoice & payment reconciliation in Salesforce

LinvioPay Pricing & Add-ons

LinvioPay comes standard with all Linvio Payments packages. No additional subscription is required for LinvioPay, although gateway processing fees apply to LinvioPay transactions.
