The Hospitality Sales & CRM Accelerator helps hospitality businesses manage complete Sales cycle from executing marketing campaigns, lead sourcing, lead qualification to sales opportunity management, managing opportunity pipeline, generating proposals and quotes to managing agreements and addressing customer services requests.

The solution framework helps hospitality businesses manage property and room details, detailed customer profiles and have a complete 360-degree view of their customers. The solution supports integrations with 3rd party channels / aggregator sites and social media sites for lead generation. The solution can be integrated with Property Management systems (PMS) for sales information and room nights consumed.

The solution can be extended further to offer advanced service management and marketing campaigns functionality via the Service cloud and Marketing cloud solutions from Salesforce.
