# adaptiv.deliver

**You've done the research, now let's finish the job.** Together, we have aligned, educated, assessed and verified that your Azure Integration Service plan will deliver on your organisation's needs. Now it is time to put your plan into action.

## Challenges

You've done the adaptiv.verify workshop, you know how it all works on paper. But, you're feeling overwhelmed and concerned about how this will work in reality. How will you guarantee a successful delivery? And how will you ensure that you are getting your value back for your strategy.

## Solution

adaptiv.deliver is your blueprint for success. Our Architects and Developers work with your team to guide you through how our respective teams will work together to ensure you get the best delivery of your project.

## Outcome

This is an ongoing asset designed to help you reach your predetermined targets throughout the course of the project delivery. You'll feel supported and confident every step of the journey – from the set-up of your infrastructure, through to implementation, training, and beyond.

# adaptiv.deliver

## A partner you can trust

We're a New Zealand owned and operated consulting partner invested in helping you to leverage and extend the value of your existing business applications, not selling you new ones.

We provide world-class integration and cloud technology consulting and execution services.

## Value you can count on

With over a decade of experience in delivering small- and large-scale integration for the enterprise, we add clear, repeatable and measurable value to our clients' bottom-line.

That's why we are the partner of choice for some of New Zealand's leading organisations.

## Confident decision-making

This workshop will provide you with the in-depth knowledge and understanding required to make an informed and confident technology recommendation of Microsoft platforms to the organisation decision-makers in readiness to proceed to a detailed assessment of your environment and objectives.

*"They were knowledgeable and super easy to work with," says Micky Heath, Victoria University of Wellington Project Manager. "Nikolai proactively forwards us information and ideas he thinks will help us. He's added a high level of expertise and leadership to the project."*

**adaptiv.deliver** is the last in the series of workshops, designed to assist you through creation and deployment of your integration strategy. This service focuses on the delivery and proof of value of your plan to ensure it runs as smoothly as possible.

## adaptiv.align

A 3-hour strategic alignment meeting with organisational C-level stakeholders to introduce Adaptiv Integration solutions, services and capabilities.

## adaptiv.educate

A half day technical product briefing to discuss available and recommended technologies.

## adaptiv.assess

A 3 to 5 day maturity workshop to establish the value and limitations of your current approach, facilitate discussions around definition roles and responsibilities, processes and future technology roadmaps.

## adaptiv.verify

A 2 to 3 day workshop is designed to prove that the selected technologies and approach will deliver the concrete outcomes required by the business.

## adaptiv.deliver

adaptiv.deliver is your blueprint for success. Our Architects and Developers work with your team to guide you.

## Adaptiv and MuleSoft

The cloud is changing the way we build and run software, but not all software will be in the cloud or in a single cloud.

MuleSoft enables you to build new integrated solutions in the cloud that leverage resources on premises and crosscloud. The Anypoint platform provides you with the tools you need to integrate your APIs with existing applications and services and give you the scale and efficiency of MuleSoft to develop, deploy and manage them. This, combined with C4E Catalyst Framework, provides solid managed Continuous Integration (CI) and Continuous Deployment (CD) for your applications.

Adaptiv is proud to be a MuleSoft Partner. We hold the highest possible levels of competency for MuleSoft integration, development and DevOps
