

## MISSION STATEMENT

Our goal is to provide best in class cloud development services that enhance productivity for government agencies by ensuring vital business functions work faster, cheaper, and better.

## CORPORATE SUMMARY

CloudWave Inc. is a Small Business Information Technology consulting firm based in Virginia that provides end-to-end services from architecture to development in niche cutting edge cloud technologies. CloudWave specializes in application development, integration, and cloud computing: SaaS, PaaS, and IaaS, machine learning/artificial intelligence, analytics/business intelligence, microservices, enterprise document management, and database development and maintenance.

Since 2012, the company has developed classified and unclassified innovative, cost-saving, low-risk solutions to federal and commercial customers both within the United States and globally. Our team has more than 30 years of exceptional systems and architecture experience and 20 years of government contracting experience.

GSA Multiple Award Schedule (MAS)

## DIFFERENTIATORS

- Experienced Certified Technical Professionals
- 20+ Years of Government Contracting
- Reliable and Innovative Solutions
- Experienced Cloud Brokers and Innovators
- Salesforce Consulting Partner
- Amazon Web Services (AWS) Partner Network
- Google Cloud Platform Partner
- Smartsheet Platinum Partner
- MuleSoft Specialists

## NAICS CODES

**541511:** Custom Computer Programming Services

**541512:** Computer Systems Design Services

**541519:** Other Computer Related Services

**541618:** Other Management Consulting Services

## DEDICATED TEAM

When you partner with CloudWave, we make it our mission to meet and exceed expectations. CloudWave will assign one of our experienced team members to oversee the contract and provide an open line of communication so we can ensure we are continuing to meet your needs.

## SUCCESS STORIES

### GENERAL SERVICES ADMINISTRATION (GSA)

CloudWave has been a trusted partner to GSA (General Services Administration) for the last 15 years, successfully helping GSA accelerate their application portfolio modernization to capitalize on the cost, performance, and security benefits of cloud computing. Our team is working with GSA at an enterprise level in support of ongoing projects with PBS (Public Building Services), FAS (Federal Acquisition Services) and OGP (Office of Governmentwide Policy) to provide innovative, cost-saving, low risk solutions.

CloudWave is providing development and operations support for 60+ Salesforce applications across the agency. The performance, capability, and capacity has elevated our team as a go-to-implementer with a proven record of delivering modernized solutions that meet the agency's missions with flexibility to update and enhance systems as GSA evolves. Our experienced team is working with GSA to deliver integrations using MuleSoft into other platforms like Zoom, Google, Databases and Alfresco in support of GSA's Document Management strategy, where our team of experts are conducting all technical work end to end including architecture and design.

CloudWave has also partnered with Google Public Sector to design and develop cloud transformation and migration services. CloudWave offers services that run on Google Cloud to create scalable, on-demand cloud solutions that have helped GSA navigate digital transformation and adopt a cloud-first strategy. We used best practices to provide architecture for Google Cloud Platform and are currently developing a custom full stack web application- Control Document Tracker, leveraging many GCP services and hosted on GCP.

### DEPARTMENT OF HOMELAND SECURITY (DHS)

An agency from The Department of Homeland Security had an app running in Salesforce that they needed to migrate to AWS. Our team analyzed the project in salesforce, interviewed the project team, then interviewed all of the integrating teams for numerous apps that integrated with this one to ensure we understood what it would take to migrate to the new platform successfully.

We presented the design for the roadmap for this migration: how much time it would take, the level of effort, and what would happen stage by stage before execution. We have an ongoing partnership consulting with this agency on additional projects as-needed.

### FEDERAL DEPOSIT INSURANCE CORPORATION (FDIC)

The Federal Deposit Insurance Corporation wanted to build two different salesforce communities with ample security for critical data. We created a consumer response center for banks that allows customers to submit questions and access essential data. We carefully set up the security so that consumers could only access information for their own banks.

We also created self-assessments for financial institutions for The Office of Minority and Women Inclusion (OMWI). We simplified forms for their level of inclusion and financials to streamline the process for banks as they chart diversity. We created reports and custom dashboards for the OMWI to use internally.
